IELTS Writing Task 2 — Model Answers

Chapter 01 · Education · 25 IELTS Liz Questions

Band 7+ sample essays · Every essay follows its essay-type guide · PEEL(R) paragraphs · Ideas and sentences from your Education Idea Bank

How to Use This Sheet

এই sheet কীভাবে পড়বে

1. প্রথমে প্রশ্নটি পড়ো এবং **নিজে 5 মিনিটে একটি পরিকল্পনা করো** (Idea Bank Part 2 পদ্ধতিতে)। তারপর model answer-এর "Plan" box-এর সাথে মিলিয়ে দেখো।
2. Model essay পড়ার সময় রঙিন label-গুলো লক্ষ করো — প্রতিটি body paragraph কীভাবে **Point → Explain → Example → Link** ধাপে এগোয়।
3. **Bold** করা collocation-গুলো তোমার Education Idea Bank-এর Part 4 থেকে নেওয়া — এগুলো খাতায় লিখে নিজের বাক্যে ব্যবহার করো।
4. প্রতিদিন 2–3টি essay পড়ো। একটি essay বেছে নিয়ে, model না দেখে, নিজের ভাষায় আবার লেখো (40 মিনিট)।
5. প্রতিটি essay-র শব্দসংখ্যা দেওয়া আছে। Advantages & Disadvantages essay-গুলো আলাদা guide মেনে লেখা: **Intro 40–50 · BP1 120–135 · BP2 120–135 · Conclusion 35–45 = 330–360**; মতামত না চাইলে (Type 1) **Intro 30–40 · Conclusion 25–35 = 310–340**। Agree / Disagree essay-গুলো আলাদা guide মেনে লেখা: **Intro 35–50 · BP1 100–120 · BP2 100–120 · Conclusion 35–55 = 270–345**। Discuss Both Views essay-গুলো আলাদা guide মেনে লেখা: **Intro 35–45 · BP1 90–120 · BP2 90–120 · Conclusion 35–45 = 260–299**। Cause/Problem + Solution essay-গুলো আলাদা guide মেনে লেখা: **Intro 30–40 · BP1 90–120 · BP2 90–120 · Conclusion 30–40 = 260–300**। Double Question essay-গুলো আলাদা

guide মেনে লেখা: **Intro 30–40 · BP1 90–120 · BP2 90–120 · Conclusion 30–40 = 260–300**।

6. Part 6-এর বাংলা essay (EDU-11, EDU-20, EDU-01) অনুবাদ করে থাকলে, এখানকার model-এর সাথে তোমার অনুবাদ মিলিয়ে দেখো। এই বাংলা essay-গুলো এখানকার English model-এর অনুবাদ হিসেবে লেখা, তাই একই কাঠামো ও একই idea পাবে।

হালকা সবুজ দাগ দেওয়া বাক্য = তোমার Education Idea Bank থেকে হুবহু বা প্রায় হুবহু নেওয়া। এই sheet-এ মোট **63টি** এমন বাক্য আছে। এগুলো তুমি আগেই পড়েছ, তাই পড়তে কম সময় লাগবে — আর দেখবে, Idea Bank-এর বাক্যগুলো সরাসরি essay-তে ব্যবহার করা যায়। পরীক্ষায় তুমিও ঠিক এভাবে নিজের মুখস্থ করা বাক্য ব্যবহার করতে পারবে।

The PEEL(R) paragraph method

Label	Meaning	What the sentence does	Typical linkers
Point	Topic sentence	States the main idea of the paragraph	The main reason… / Firstly… / However, I believe…
Explain	Explanation	Says **why** or **how** the point is true (often 2–3 sentences)	This is because… / Since… / As a result…
Example	Example	Gives a specific, realistic example	For example… / For instance… / In Bangladesh…

Label	Meaning	What the sentence does	Typical linkers
Link	Link / result	Connects back to the question or shows the result	Therefore… / As a result… / In this way…
Response	Response to the other side	Admits the opposite view, then answers it (the **R** in PEELR)	Admittedly… / Although… / However, …
Topic	Topic sentence (Adv/Disadv only)	Opens the paragraph with a fixed sentence	There is little doubt that… / On the other hand, it cannot be denied that…
Summary	Summary (Adv/Disadv only)	Sums up the paragraph in general words	Overall, … / Although these…
Solution	Solution (Cause/Problem + Solution only)	Says who acts and what they do	The most effective solution is for… / In addition, …

> **PEEL বনাম PEELR:** সাধারণ body paragraph-এ **PEEL** যথেষ্ট। কিন্তু opinion বা discussion essay-তে যখন বিপরীত মতকে মেনে নিয়ে জবাব দিতে হয় ("Admittedly… However…"), তখন **R (Response)** যোগ করো — এতে লেখা আরও পরিণত ও যুক্তিপূর্ণ দেখায়, যা Band 7-এর জন্য গুরুত্বপূর্ণ।

> **Advantages & Disadvantages essay (4টি) — নতুন নির্দিষ্ট কাঠামো** (IELTS_Advantages_Disadvantages_Essay_Guide.md

অনুযায়ী):

- **Introduction:** প্রশ্নের paraphrase → **Although** + যে দিক তুমি সমর্থন করো না (2 point), + যে দিক তুমি সমর্থন করো (2 point), but ছাড়া → মতামত (শুধু প্রশ্ন মতামত চাইলে)।
- **Body 1 = সুবিধা, Body 2 = অসুবিধা — প্রতিটিতে ঠিক 7টি বাক্য:** Topic → Point → Explain → Example → Point → Explain → Summary ।
- **Body 1 linker:** There is little doubt that... → To begin with → This is because → For example → In addition → As a result → Overall।
- **Body 2 linker:** On the other hand, it cannot be denied that... → Firstly → "; as a result," → For instance → Secondly → If... consequently → শেষ বাক্য: Type 1 হলে Overall, these...; সুবিধার পক্ষে হলে Although these [problems]..., most...; অসুবিধার পক্ষে হলে Although some [people]..., these [problems] often...।
- **Conclusion:** In conclusion + নতুন paraphrase → **While** + দুই দিক, Although বাক্যের একই ক্রমে → মতামত আবার বলো (শুধু প্রশ্ন মতামত চাইলে)।
- 🚫 **প্রশ্ন মতামত না চাইলে (Type 1):** Introduction ও Conclusion-এ মাত্র **2টি বাক্য**। মতামত লিখবে না, আর "This essay will examine both the benefits and the drawbacks..." ধরনের plan sentence-ও লিখবে না — এটি মুখস্থ করা বাক্য মনে হয় এবং নতুন কোনো idea যোগ করে না। Introduction শেষ হবে Although বাক্যে, essay শেষ হবে While বাক্যে।
- ⭐ **Emphasis rule:** Although/While বাক্যে পাঠক সবসময় **শেষের idea (comma-র পরের অংশ)**-কে তোমার মত হিসেবে ধরে। তাই সুবিধার পক্ষে হলে আগে অসুবিধা, পরে সুবিধা; অসুবিধার

পক্ষে হলে আগে সুবিধা, পরে অসুবিধা। Type 1-এ (মতামত নেই) সাধারণত আগে অসুবিধা, পরে সুবিধা।

Agree / Disagree essay (7টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Agree_Disagree_Essay_Guide.md অনুযায়ী):

- 🚫 **কখনো আংশিক উত্তর নয়:** শুরু থেকে শেষ পর্যন্ত একটিই পক্ষ। "partly agree", "largely agree", "to some extent" লিখবে না।
- **Introduction (2টি বাক্য):** প্রশ্নের paraphrase → I completely agree/disagree with this view because + Idea 1 + Idea 2।
- **Body 1 = Idea 1:** Point → Explain → Explain → Example → Link ।
- **Body 1 linker:** The main reason why I agree/disagree with this idea is that… → This is because… → "; as a result," → For example… → Therefore…।
- **Body 2 = Idea 2:** Point → Explain → Example → Response → Link ।
- **Body 2 linker:** Another important reason for my agreement/disagreement is that… → When… → For instance… → Although some people argue that…, [তোমার পক্ষ] → Consequently…।
- **Conclusion (2টি বাক্য):** In conclusion, I firmly believe that… → Idea 1 ও Idea 2 নতুন শব্দে। নতুন কোনো idea নয়।
- ⭐ **Response বাক্য:** বিপরীত মত থাকবে Although অংশে, আর তোমার পক্ষ থাকবে comma-র পরে, but ছাড়া। তাই উত্তর আংশিক হয় না।

Discuss Both Views essay (8টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Discuss_Both_Views_Essay_Guide.md অনুযায়ী):

- 🚫 **কখনো আংশিক উত্তর নয়:** একটিই স্পষ্ট মত। "both views are important", "it depends" লিখবে না।
- ⭐ **Order rule:** বিপরীত মত সবসময় আগে, তোমার মত সবসময় শেষে। তাই "the latter view" সবসময় তোমার পক্ষকেই বোঝায়।
- **Introduction:** While some people argue that [বিপরীত মত], others believe that [তোমার মত]. → I completely support the latter view because [মূল কারণ].
- **Body 1 = বিপরীত মত ("I" ছাড়া):** Point → Explain → Explain → Example → Link ।
- **Body 1 linker:** On the one hand, people who… argue that… → For example… → For this reason, many people believe that…।
- **Body 2 = তোমার মত:** Point → Explain → Example → Response → Link ।
- **Body 2 linker:** On the other hand, I firmly believe that… because… → For instance… → Although some people argue that [Body 1-এর যুক্তি], [তোমার পক্ষ] → Consequently…।
- **Conclusion (2টি বাক্য):** In conclusion, people hold different views on whether… → While [বিপরীত মত], I firmly believe that [তোমার মত] because [কারণ]।
- **শব্দসংখ্যা:** সবসময় 300-এর নিচে। সহজ হিসাব: 40 + 100 + 100 + 40 = 280।

Cause/Problem + Solution essay (2টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Cause_Problem_Solution_Essay_Guide.md অনুযায়ী):

- ⭐ **ধরন চেনো:** শুধু প্রথম প্রশ্নটি দেখো। কেন ঘটছে জানতে চাইলে **Cause essay**, কী ক্ষতি হচ্ছে জানতে চাইলে **Problem essay**।

প্রশ্নে "this problem" থাকলেই সেটি Problem essay হয় না।

- 🚫 **মতামত নয়:** প্রশ্ন না চাইলে "I think" বা "In my opinion" লিখবে না। "This essay will..." বাক্যও লিখবে না।
- **Introduction (2টি বাক্য):** paraphrase → 2টি কারণ বা সমস্যা, but + 2টি সমাধান।
- **Body 1 = 2টি কারণ বা সমস্যা:** Point → Explain → Example → Point → Explain → Link ।
- **Body 2 = 2টি সমাধান:** Solution → Explain → Example → Solution → Explain → Link ।
- ⭐ **Mirror rule:** সমাধান 1 ঠিক করে কারণ বা সমস্যা 1, সমাধান 2 ঠিক করে কারণ বা সমস্যা 2। প্রতিটি সমাধানে থাকবে কে করবে, কী করবে, আর তাতে কীভাবে কাজ হবে (WHO + WHAT + HOW)।
- **Conclusion (2টি বাক্য):** কারণ বা সমস্যা নতুন শব্দে → সমাধান নতুন শব্দে + চূড়ান্ত ফল। নতুন কোনো idea নয়।
- **শব্দসংখ্যা:** সহজ হিসাব: 35 + 105 + 105 + 35 = 280।
- **একই পরিবারের অন্য প্রশ্ন (guide Section 14):** শুধু সমাধান, দুই পক্ষের সমাধান, বা শুধু সমস্যা চাইলে প্রতিটি body paragraph-এ একটিই idea: Point / Solution → Explain → Explain → Example → Link । মতামত নয়।

Double Question essay (4টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Double_Question_Essay_Guide.md অনুযায়ী):

- ⭐ **ভাগ করো:** Q1 যাবে Body 1-এ, Q2 যাবে Body 2-এ, প্রশ্নের ক্রমেই। প্রতিটি প্রশ্ন আলাদা করে পরীক্ষা করো।
- **পক্ষ বেছে নিতে হলে (হ্যাঁ/না, ভালো/খারাপ) = Opinion block:** Point (I firmly believe that... because...) → Explain →

Example → Response (Although some people argue that...) → Link (Therefore...)। Body 2-তে শুরু: As for whether...

- **কেন / কী / কীভাবে জানতে চাইলে = List block (2টি idea):** Point → Explain → Example → Point → Explain → Link (Consequently... / Together, these measures would...)। সমাধান হলে Point-এর জায়গায় Solution । List block-এ "I" লিখবে না।
- ⭐ **"do you think" ফাঁদ:** প্রশ্নের প্রথম শব্দ দেখো। *Why do you think...?* আসলে কারণ চায় (List), মত নয়।
- ⭐ **"other" ফাঁদ:** প্রশ্নে *other* থাকলে প্রশ্নে দেওয়া idea বাদ দিয়ে নতুন idea লেখো।
- **Introduction (2টি বাক্য):** paraphrase → [উত্তর 1], and [উত্তর 2]। মতের কারণ Introduction-এ নয়, Opinion block-এর শুরুতে।
- **Conclusion (2টি বাক্য):** In conclusion, [উত্তর 1 নতুন শব্দে]. [উত্তর 2 নতুন শব্দে]. কোনো প্রশ্নই মত না চাইলে (List + List) কোথাও "I" নয়।
- **শব্দসংখ্যা:** সহজ হিসাব: 35 + 105 + 105 + 35 = 280।

Model Answers

1. EDU-01 — International exchange visits

Some educationalists think that international exchange visits will benefit teenagers at the school. To what extent do the advantages outweigh the disadvantages?

Essay type	Advantages vs Disadvantages — Type 2 (outweigh)
Position	The advantages clearly outweigh the disadvantages.
Ideas from Idea Bank (Part 3)	Studying Abroad, Exchange Visits and Foreign Languages
Structure	Adv/Disadv guide: Although-intro → BP1 advantages (7 sentences) → BP2 disadvantages (7 sentences) → While-conclusion
Reused from Idea Bank	5 sentences (highlighted)
Word count	Intro 49 · BP1 126 · BP2 135 · Conclusion 44 · **Total 354**

Introduction · 49 words

Many schools now organise exchange visits in which teenagers live with a host family and study abroad for a few weeks. Although these visits can be costly and stressful for some pupils, they also broaden teenagers' horizons and build independence. In my opinion, their advantages clearly outweigh the disadvantages.

Body Paragraph 1 · 126 words

Topic There is little doubt that international exchange visits offer considerable advantages to teenagers. Point To begin with, the

greatest benefit is that such a visit helps young people **broaden their horizons**. Explain This is because living in another country exposes students to different customs, foods, values and ways of thinking, which builds tolerance. Example For example, a Bangladeshi teenager who spends a month in Japan learns to value punctuality, and this lesson often lasts a lifetime. Point In addition, an exchange visit not only builds independence but also improves pupils' foreign language skills. Explain As a result of solving problems alone, these students develop **confidence and maturity**, which help them later at university and work. Summary Overall, a short stay abroad prepares teenagers for both adult life and a connected, multicultural world.

Body Paragraph 2 · 135 words

Topic On the other hand, it cannot be denied that exchange visits also have some drawbacks. Point Firstly, many families find these trips expensive, because flights, insurance and daily costs add up quickly. Explain Without financial support, pupils from low-income homes often cannot take part; as a result, the benefits may go mainly to wealthier students. Example For instance, a talented pupil whose parents earn a small salary may have to stay at home while richer classmates travel abroad, which feels unfair. Point Secondly, homesickness and **culture shock** can be a serious obstacle, as teenagers on short exchanges may feel anxious living with strangers. Explain If they cannot settle in quickly, they may stop enjoying the experience and, consequently, learn very little from it. Summary Although these financial and emotional challenges are real,

schools can reduce them through **scholarships** and careful preparation.

Conclusion · 44 words

In conclusion, studying with a host family overseas has become a popular part of school life. While such trips may be costly and emotionally demanding, they make teenagers more open-minded, independent and confident. Therefore, I firmly believe that the benefits far outweigh the drawbacks.

2. EDU-02 — Computer skills as a fourth basic skill

For centuries, important parts of education have remained the same, such as reading, writing and maths. With the advent of computers, some people think that computer skills should be added to the list as a fourth basic skill. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely agree.
Ideas from Idea Bank (Part 3)	Technology in Schools · Academic Subjects vs Practical Skills
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	1 sentence (highlighted)
Word count	Intro 47 · BP1 118 · BP2 120 · Conclusion 38 · **Total 323**

Introduction · 47 words

For hundreds of years, schools have treated reading, writing and mathematics as the basics of education, but many people now believe that computer skills deserve the same status. I completely agree with this view because these skills are needed for almost every job and for daily life.

Body Paragraph 1 · 118 words

Point The main reason why I agree with this idea is that almost every job requires **digital skills**. Explain This is because office workers use spreadsheets and email, farmers check market prices on their phones, and even small shop owners now sell their products online. Explain Technology also changes very quickly; as a result, people who do not learn these skills at school risk being left behind in the job market. Example For example, a graduate who cannot use a computer will struggle to find work, because most jobs are now advertised online, and this problem can limit their income for many years. Link Therefore, teaching computer skills from an early age **equips students with** the tools that they need for future employment.

Body Paragraph 2 · 120 words

Point Another important reason for my agreement is that computer literacy has become necessary for everyday life. Explain When citizens pay bills, book tickets or use government services, they increasingly have to do it online, so people without basic training can easily feel excluded. Example For instance, a person who never learned computer skills may have to travel to an office and queue to pay an electricity bill, while a neighbour does it on a phone in two minutes. Response Although some people argue that computers will weaken traditional skills, children actually use reading, writing and mathematics every time they work on a computer. Link Consequently, computer skills should stand beside the traditional basics so that no child grows up unable to manage these tasks.

Conclusion · 38 words

In conclusion, I firmly believe that computer ability should join reading, writing and mathematics as a fourth basic skill. Young people need it to find work, and they also need it to manage ordinary tasks easily and confidently.

3. EDU-03 — More funding for science subjects

The government should allocate more funding to teaching sciences rather than other subjects in order for a country to develop and progress. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Arts, Music, Sport & PE · Academic Subjects vs Practical Skills
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 46 · BP1 107 · BP2 109 · Conclusion 38 · **Total 300**

Introduction · 46 words

It is often argued that governments should spend more money on science teaching than on other subjects because this helps a country to progress. I completely disagree with this view because a growing country needs many kinds of skills and other subjects also build better citizens.

Body Paragraph 1 · 107 words

Point The main reason why I disagree with this idea is that a country cannot develop with scientists alone. Explain This is because a modern economy also needs managers, designers, writers, lawyers and teachers, and these people depend on subjects other than science. Explain Languages, history, economics and the arts develop **communication, creativity and critical thinking**; as a result, they prepare students for many well-paid careers. Example For example, a successful technology company employs engineers to build a product, but it also needs designers to make it attractive and marketing experts to sell it. Link Therefore, giving most of the money to science would leave the economy short of other skilled workers.

Body Paragraph 2 · 109 words

Point Another important reason for my disagreement is that other subjects help young people to become responsible citizens. Explain When students attend well-funded humanities classes, history and literature help them understand society, human behaviour and different points of view, which every citizen needs. Example For instance, a brilliant scientist who has never studied society may develop a powerful new technology without thinking about how it could harm ordinary people, which creates new problems. Response Although some people argue that a country's development depends on **science and technology**, technology only brings real progress when educated citizens use it wisely. Link Consequently, governments should fund all subjects fairly and support a **well-rounded education** for every student.

Conclusion · 38 words

In conclusion, I firmly believe that science should not receive more public money than other school subjects. National progress requires a wide range of abilities, and the arts and humanities also produce thoughtful people who use knowledge responsibly.

4. EDU-04 — Discipline: teachers or parents?

Discipline is an ever-increasing problem in modern schools. Some people think that discipline should be the responsibility of teachers, while others think that this is the role of parents. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Parents should be responsible for discipline.
Ideas from Idea Bank (Part 3)	Discipline, Behaviour and School Life · The Role of Teachers and Parents
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 39 · BP1 101 · BP2 114 · Conclusion 42 · **Total 296**

Introduction · 39 words

Poor behaviour has become a growing concern in many schools. While some people argue that teachers should control it, others believe that this is the duty of parents. I completely support the latter view because discipline begins at home.

Body Paragraph 1 · 101 words

Point On the one hand, people who support the role of teachers argue that discipline at school is part of their professional duty.

Explain Spending many hours with pupils every day, teachers can set classroom rules and deal with problems immediately. Explain Clear rules that are applied fairly and consistently are more effective than harsh punishments; as a result, pupils learn to respect them. Example For example, a teacher who treats every pupil in the same way can turn a noisy class into a calm one, and this helps everyone to concentrate. Link For this reason, many people believe that teachers should be responsible for discipline.

Body Paragraph 2 · 114 words

Point On the other hand, I firmly believe that parents should take this responsibility because long before children enter a classroom, they learn language, habits and values at home. Explain When parents teach **moral values**, such as honesty and respect, early, children bring these habits to school, and teachers can concentrate on teaching. Example For instance, a child who is never taught respect at home may refuse to follow a teacher's instructions, which disturbs the whole class. Response Although some people argue that fair rules at school can control behaviour, these rules have little effect on a child who has not learned respect at home. Link Consequently, parents are the right people to take responsibility for their children's behaviour.

Conclusion · 42 words

In conclusion, people hold different views on whether teachers or parents should be responsible for discipline in schools. While fair classroom rules can keep lessons calm, I firmly believe that parents should take this duty because respect is first learned at home.

5. EDU-05 — Homework every day?

Some people believe that children should not be given homework every day, while others believe that they must get homework every day in order to be successful at school. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Homework should not be given every day.
Ideas from Idea Bank (Part 3)	Exams, Assessment and Homework · The Role of Teachers and Parents
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	5 sentences (highlighted)
Word count	Intro 39 · BP1 101 · BP2 110 · Conclusion 40 · **Total 290**

Introduction · 39 words

While some people argue that daily homework is necessary for success at school, others believe that children should not receive it every day. I completely support the latter view because young people also need time to rest and play.

Body Paragraph 1 · 101 words

Point On the one hand, people who support daily homework argue that it helps children **practise what they have learned** in class.

Explain Regular practice strengthens memory, and it also allows parents to see what their children are studying. Explain Difficult skills such as spelling and mathematics are mastered through repetition; as a result, students become more confident. Example For example, a student who solves a few maths problems every evening is likely to remember the method better than one who practises only in class, and this can lead to higher marks. Link For this reason, many people believe that homework should be given every day.

Body Paragraph 2 · 110 words

Point On the other hand, I firmly believe that homework should not be given daily because too much homework leaves children tired and stressed. Explain When children finish a long school day and then start more work, they lose time for play, sport, family and sleep, and their interest in learning falls. Example For instance, a student in Bangladesh who attends school and private tuition may still be doing homework at night, which leaves almost no time for rest. Response Although some people argue that daily practice improves memory, a tired child cannot concentrate or remember lessons well. Link Consequently, setting homework only a few times a week is better for children's learning and health.

Conclusion · 40 words

In conclusion, people hold different views on whether children should be given homework every day. While daily practice can strengthen memory, I firmly believe that it should not be a daily burden because children need time to rest and play.

6. EDU-06 — Parental pressure and the role of parents

Some children receive almost no encouragement from their parents regarding their performance at school, while other children receive too much pressure from their over-enthusiastic parents, which can have a negative impact on the child. Why do you think some parents put too much pressure on their children to perform well at school? What do you think the role of a parent should be in their child's education?

Essay type	Double Question — List + List (reasons + roles)
Position	No opinion is asked for. Competition and comparison are the reasons; a parent's role is to support learning and work with teachers.
Ideas from Idea Bank (Part 3)	The Role of Teachers and Parents · Exams, Assessment and Homework
Structure	Double Question guide (List + List): Answer 1 + answer 2 → BP1 = Q1, List block (P E X P E L) → BP2 = Q2, List block (P E X P E L) → Both answers in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 36 · BP1 118 · BP2 111 · Conclusion 33 · **Total 298**

Introduction · 36 words

Some children get little encouragement from home, while others are pushed very hard by their parents. This is mainly because

competition is intense and parents compare children, and parents should support learning rather than control it.

Body Paragraph 1 · 118 words

Point One of the main reasons for **excessive parental pressure** is intense competition. Explain Some parents push their children very hard to achieve top grades, because they want them to enter a good university or a well-paid profession, so they demand constant study. Example For example, a mother who fears that her son will not get into a medical college may send him to private tuition every evening, and this leaves him no time to rest. Point Another important reason is social comparison with relatives and neighbours. Explain Parents often feel embarrassed when another child gets better results; as a result, they push their own child even harder. Link Consequently, excessive pressure can cause anxiety, loss of confidence and even a dislike of learning.

Body Paragraph 2 · 111 words

Point One important role of a parent is to **support rather than control** a child's learning. Explain When parents provide a quiet place to study, show interest in schoolwork and praise effort as well as results, children become more motivated and confident. Example For instance, a girl whose father encourages her after a poor test result is more likely to keep trying, which can gradually improve her marks. Point Another important role is to work closely with teachers. Explain Parents who stay in contact with the school can notice problems early, which means that children get help before they fall

behind. Link Consequently, children whose parents guide them patiently are more likely to **reach their full potential**.

Conclusion · 33 words

In conclusion, some parents put heavy pressure on their children because the competition for success is fierce and they compare their children with others. Instead, parents should encourage effort and cooperate with teachers.

7. EDU-07 — Cutting art and music

The role of education is to prepare children for the modern world. Schools should cut art and music out of the curriculum so that children can focus on useful subjects such as information technology. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Arts, Music, Sport & PE · Technology in Schools
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 43 · BP1 115 · BP2 112 · Conclusion 41 · **Total 311**

Introduction · 43 words

It is often argued that schools should remove art and music from their timetables so that pupils can concentrate on practical subjects such as computing. I completely disagree with this view because these subjects develop children's creativity and help them to manage stress.

Body Paragraph 1 · 115 words

Point The main reason why I disagree with this idea is that art and music **encourage creativity and self-expression**, which are increasingly valued by employers. Explain This is because a modern workplace needs people who can produce new ideas, not only people who can operate a computer. Explain Machines can now perform routine tasks quickly; as a result, original thinking has become one of the most useful skills that a worker can offer. Example For example, a student who learns to draw at school may later design attractive websites for a company, and this job requires artistic ability as well as technical knowledge. Link Therefore, removing these lessons would leave children less prepared for the modern world, not more prepared.

Body Paragraph 2 · 112 words

Point Another important reason for my disagreement is that creative lessons protect children's mental well-being. Explain When pupils spend long hours preparing for exams, they often feel tired and anxious, and art and music give them a healthy way to express emotions and **reduce stress**. Example For instance, a pupil who feels anxious before exams may relax by playing in the school music group, which helps them to return to their studies with a calmer mind. Response Although some people argue that limited school hours should be spent only on job-related skills, a tired and unhappy child cannot learn any subject effectively. Link Consequently, these lessons support academic learning and deserve their place in a **well-rounded education**.

Conclusion · 41 words

In conclusion, I firmly believe that art and music should keep their place in the school curriculum instead of being replaced by technical subjects. These lessons build the imaginative skills that employers want, and they also keep young learners emotionally healthy.

8. EDU-08 — Studying literature in high school

Some people think that students in high school should not waste their time studying literature, such as poems and novels. Do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Academic Subjects vs Practical Skills · The Role of Teachers and Parents
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	1 sentence (highlighted)
Word count	Intro 42 · BP1 110 · BP2 120 · Conclusion 38 · **Total 310**

Introduction · 42 words

It is sometimes claimed that teenagers at secondary school gain nothing from reading novels and poems, so these lessons are a waste of time. I completely disagree with this view because literature improves students' language skills and helps them to think critically.

Body Paragraph 1 · 110 words

Point The main reason why I disagree with this idea is that studying literature greatly improves students' **language skills**. Explain This is because students who read novels and poems meet a wide range of vocabulary, sentence structures and styles of writing that textbooks

rarely contain. Explain They also learn how good authors express ideas clearly and powerfully; as a result, their own reading and writing become stronger in every subject. Example For example, a student who reads short stories regularly usually writes better essays than one who reads only textbooks, and this ability remains useful at university. Link Therefore, literature lessons are practical preparation for further study and for any job that requires clear writing.

Body Paragraph 2 · 120 words

Point Another important reason for my disagreement is that literature helps young people to **think critically** and understand others. Explain When students discuss a poem or the actions of a character, they learn to question ideas and form their own opinions, and they also begin to see life through other people's eyes. Example For instance, a student who reads a novel about poverty may become more aware of social problems in their own country, which can make them a kinder citizen. Response Although some people argue that literature does not lead directly to a job, these abilities are essential in many professions and in responsible citizenship. Link Consequently, time spent on novels and poems is a valuable investment in a young person's mind and character.

Conclusion · 38 words

In conclusion, I firmly believe that high schools should continue to teach poems and novels instead of treating them as wasted time. Such lessons make teenagers stronger readers and writers, and they also develop independent thinking and empathy.

9. EDU-09 — Educational activities in free time

Some parents believe that their children should do educational activities during their free time. Others say that in this way children are under pressure. Discuss both views and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Educational activities in free time put children under too much pressure.
Ideas from Idea Bank (Part 3)	Exams, Assessment and Homework · The Role of Teachers and Parents
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	1 sentence (highlighted)
Word count	Intro 36 · BP1 96 · BP2 114 · Conclusion 39 · **Total 285**

Introduction · 36 words

While some parents argue that children should spend their free time on educational activities, others believe that this places young people under pressure. I completely support the latter view because children need real rest after school.

Body Paragraph 1 · 96 words

Point On the one hand, parents who support these activities argue that they help children to succeed in a competitive world.

Explain Reading, language courses and science clubs develop knowledge and skills that school alone may not provide. Explain New interests can also be discovered outside the classroom; as a result, children may have a clearer idea of their future. Example For example, a child who attends a weekend computer class may become interested in technology, and this interest can later lead to a successful career. Link For this reason, many parents believe that free time should be used for learning.

Body Paragraph 2 · 114 words

Point On the other hand, I firmly believe that these activities put children under pressure because young people already work hard at school. Explain When every free hour is filled with classes, children have no time to relax, and excessive pressure can cause anxiety, loss of confidence and even a dislike of learning. Example For instance, a child who goes from school to tuition and then to a language course may feel exhausted by the weekend, which can destroy their interest in studying. Response Although some people argue that extra classes build useful skills, a tired and anxious child is unlikely to learn them well. Link Consequently, children should be allowed to enjoy their free time without extra lessons.

Conclusion · 39 words

In conclusion, people hold different views on whether children's free time should be spent on educational activities. While extra classes can develop useful skills, I firmly believe that they create too much pressure because children need time to relax.

10. EDU-10 — Sending disruptive children out of class

Some people think that teachers should be able to ask disruptive children to leave the class. Do you think it is the best way to deal with a disruptive child in the classroom? What other solutions are there?

Essay type	Double Question — Opinion + List (opinion + other solutions)
Position	Sending a child out is not the best way; finding the cause and working with parents would work better.
Ideas from Idea Bank (Part 3)	Discipline, Behaviour and School Life · The Role of Teachers and Parents
Structure	Double Question guide (Opinion + List): Answer 1 + answer 2 → BP1 = Q1, Opinion block (P E X R L) → BP2 = Q2, List block (P E X P E L) → Both answers in new words
Reused from Idea Bank	1 sentence (highlighted)
Word count	Intro 37 · BP1 115 · BP2 113 · Conclusion 34 · **Total 299**

Introduction · 37 words

Some people believe that teachers should be allowed to send disruptive pupils out of the classroom. I firmly believe that this is not the best way, and finding the cause and working with parents would work better.

Body Paragraph 1 · 115 words

Point I firmly believe that sending a disruptive child out of class is not the best way because it does not **address the root causes** of the behaviour. Explain When a pupil is removed, they miss the lesson and fall further behind, so they may become even more frustrated. Example For example, a child who misbehaves because they cannot understand mathematics will understand even less if they are regularly sent outside, which makes the problem worse. Response Although some people argue that a single **disruptive pupil** can waste a large part of a lesson, removing the child only moves the problem out of the room for a short time. Link Therefore, exclusion should only be used as a last resort.

Body Paragraph 2 · 113 words

Solution The most effective alternative is for teachers to find out why a child misbehaves and provide the right support. Explain If boredom or a learning difficulty is the cause, extra help, counselling or more engaging tasks can remove the reason for the bad behaviour. Example For instance, a pupil who receives praise and a reward chart for good behaviour may gradually become calmer, which helps the whole class. Solution In addition, schools could work closely with parents. Explain When teachers and parents agree on the same rules at home and at school, the child receives a consistent message, so good habits develop faster. Link Together, these measures would change behaviour far more effectively than sending the child away.

Conclusion · 34 words

In conclusion, I firmly believe that removing disruptive pupils from lessons is not ideal because it ignores the cause of the problem. Individual support and close cooperation with parents would improve behaviour more effectively.

11. EDU-11 — Free education at all levels

Education should be accessible to people of all economic backgrounds. All levels of education, from primary school to tertiary education, should be free. To what extent do you agree with this opinion?

Essay type	Agree / Disagree
Position	I completely agree.
Ideas from Idea Bank (Part 3)	Education and Cost: Should Education Be Free? · Education and Inequality
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	9 sentences (highlighted)
Word count	Intro 46 · BP1 118 · BP2 114 · Conclusion 44 · **Total 322**

Introduction · 46 words

It is often argued that learning should be open to everyone, whatever their income, and that students should pay nothing from primary school to university. I completely agree with this view because free education gives every child a fair chance and benefits society as a whole.

Body Paragraph 1 · 118 words

Point The main reason why I agree with this idea is that free education **provides equal opportunities** for all children. Explain This is

because talent is found in every social class, but money is not, so family income should never decide who can study. Explain When universities charge high tuition fees, many intelligent young people from low-income families never apply; as a result, their abilities are wasted and they stay poor. Example For example, if the bright child of a poor farmer can study medicine for free, they may become a doctor, and this single graduate can lift a whole family into a better life. Link Therefore, free education at every level can help to **break the cycle of poverty** in many families.

Body Paragraph 2 · 114 words

Point Another important reason for my agreement is that free education benefits the economy and society. Explain When young people can study without fees, the nation gains a **highly educated workforce**, which makes it more productive, more innovative and more attractive to foreign investors. Example For instance, a young engineer who graduates without debt can stay in Bangladesh and start a small company, which creates jobs and brings more tax income to the state. Response Although some people argue that free higher education is extremely expensive, the money spent on education is not a cost but a **long-term investment**. Link Consequently, free learning at every level repays the government through higher taxes and lower spending on welfare and crime.

Conclusion · 44 words

In conclusion, I firmly believe that every stage of learning, from the first year of school to the last year of university, should cost nothing.

This gives children from poor homes a fair chance, and it also builds a stronger and more productive nation.

12. EDU-12 — Continuous assessment instead of exams

The current trend in education is to move away from traditional exams and instead have continuous assessment over the school year. What do you think of this trend?

Essay type	Agree / Disagree (opinion on a trend)
Position	I completely agree that this is a positive trend.
Ideas from Idea Bank (Part 3)	Exams, Assessment and Homework
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 39 · BP1 114 · BP2 113 · Conclusion 36 · **Total 302**

Introduction · 39 words

Many schools are now replacing traditional final exams with continuous assessment throughout the year, and many people see this as a positive change. I completely agree with this view because it measures real understanding and reduces harmful exam pressure.

Body Paragraph 1 · 114 words

Point The main reason why I agree with this idea is that continuous assessment offers a more complete picture of a student's ability. Explain This is because traditional exams often **test memory rather**

than understanding, so students may memorise answers the night before and forget everything a week later. Explain Projects, presentations and class work also give students regular feedback; as a result, they can correct their weaknesses before it is too late. Example For example, a student who writes a weak science report in the first term can learn from the teacher's comments and produce a much better one in the second term. Link Therefore, continuous assessment rewards genuine learning rather than a good memory on one day.

Body Paragraph 2 · 113 words

Point Another important reason for my agreement is that continuous assessment reduces the harmful pressure of a single final exam. Explain When a whole year's result depends on a few hours, one bad day caused by illness or anxiety can ruin months of hard work. Example For instance, a pupil who works hard all year but falls ill on exam day will not be unfairly punished, because most of their marks have already been earned. Response Although some people argue that coursework is easier to copy, teachers can prevent this by setting tasks in class and asking students to present their own work. Link Consequently, students are encouraged to **work consistently** instead of memorising everything the night before.

Conclusion · 36 words

In conclusion, I firmly believe that moving from final exams to continuous assessment is a positive development for schools. It

measures what students truly understand, and it protects them from the stress of one decisive exam.

13. EDU-13 — Educated people vs experience

Some people think that educated people are more valuable than people who have learned skills through experience. Do you think that educated people are the most valuable for society? What kinds of skills can people learn through experience that can benefit society?

Essay type	Double Question — Opinion + List (opinion + skills)
Position	Educated people are not the most valuable; practical skills and people skills learned at work also benefit society.
Ideas from Idea Bank (Part 3)	University Education and Employment · Academic Subjects vs Practical Skills
Structure	Double Question guide (Opinion + List): Answer 1 + answer 2 → BP1 = Q1, Opinion block (P E X R L) → BP2 = Q2, List block (P E X P E L) → Both answers in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 40 · BP1 107 · BP2 106 · Conclusion 36 · **Total 289**

Introduction · 40 words

Some people argue that educated people are worth more to society than those who have learned through experience. I firmly believe that they are not the most valuable, and practical skills and people skills learned at work also benefit society.

Body Paragraph 1 · 107 words

Point I firmly believe that educated people are not the most valuable members of society because a community depends equally on workers who learned through practice. Explain Doctors and engineers are clearly valuable, but a city could not function without electricians, plumbers, mechanics, farmers and drivers. Example For example, a hospital full of highly trained doctors cannot treat patients if no electrician can repair its power supply, which shows that both groups are needed. Response Although some people argue that educated professionals earn more and pay more tax, a high salary does not prove that someone is more useful. Link Therefore, people with practical experience deserve the same respect as university graduates.

Body Paragraph 2 · 106 words

Point One important skill that people learn through experience is practical, technical ability. Explain Someone who starts as an apprentice electrician or builder gains **hands-on experience** and may become a skilled professional without ever going to university. Example For instance, a young mechanic who trains in a small garage for several years can fix engines that many engineering graduates have only studied in theory. Point Another important skill is the ability to deal with people. Explain Experience develops **soft skills** such as communication, teamwork and problem-solving; as a result, workers learn to calm customers, negotiate prices and settle disagreements. Link Consequently, these skills create jobs, serve communities and keep the economy running.

Conclusion · 36 words

In conclusion, I firmly believe that formal education does not make people the most valuable because society relies on practical workers too. Hands-on technical skills and the ability to work with people also bring great benefits.

14. EDU-14 — When to start a foreign language

Being able to speak a foreign language is an advantage these days. Some people think that children should start learning a foreign language at primary school, while others think children should begin in secondary school. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Children should start learning a foreign language at primary school.
Ideas from Idea Bank (Part 3)	Studying Abroad, Exchange Visits and Foreign Languages
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 37 · BP1 92 · BP2 108 · Conclusion 42 · **Total 279**

Introduction · 37 words

While some people argue that children should begin learning a foreign language at secondary school, others believe that primary school is the right time. I completely support the latter view because young children learn languages more easily.

Body Paragraph 1 · 92 words

Point On the one hand, people who support a later start argue that primary school children should first master their own language. Explain Learning two languages at the same time may confuse young children, and older children learn grammar more effectively. Explain Difficult rules can be explained more clearly to teenagers; as a result, they may make faster progress. Example For example, a twelve-year-old can follow a grammar explanation that a six-year-old would find difficult, and this saves time in the classroom. Link For this reason, many people believe that language lessons should wait until secondary school.

Body Paragraph 2 · 108 words

Point On the other hand, I firmly believe that children should start at primary school because they can copy pronunciation naturally and are less afraid of making mistakes. Explain When children start early, they speak without fear, and they also have more years of practice before they finish school. Example For instance, a Bangladeshi child who learns English songs and rhymes at primary school may later speak with more confidence than one who starts at thirteen. Response Although some people argue that teenagers understand grammar better, this advantage cannot replace the extra years of practice that young learners enjoy. Link Consequently, an early start gives children the best chance to become confident speakers.

Conclusion · 42 words

In conclusion, people hold different views on whether foreign language lessons should begin at primary or secondary school. While

older students may understand grammar more easily, I firmly believe that primary school is better because young learners gain confidence and more practice.

15. EDU-15 — Education gap: rich and poor countries

The gap between education in richer countries and education in poorer countries is a growing concern. What solutions can you suggest to deal with this situation?

Essay type	Solutions only (Cause/Problem + Solution guide, Section 14)
Position	No opinion is asked for. Poorer governments should make education a priority, and richer nations should fund resources and online lessons.
Ideas from Idea Bank (Part 3)	Education and Inequality: Rich and Poor, City and Village · Technology in Schools
Structure	Cause/Problem + Solution guide, Section 14: both answers in one sentence → BP1 Solution 1 (N E E X L) → BP2 Solution 2 (N E E X L) → Same ideas in new words, no opinion
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 40 · BP1 103 · BP2 99 · Conclusion 36 · **Total 278**

Introduction · 40 words

The difference in the quality of education between rich and poor countries is becoming a serious concern. Poorer governments can tackle this by investing more in schools and teachers, and richer nations can help by funding resources and online lessons.

Body Paragraph 1 · 103 words

Solution The most effective solution is for governments in poorer countries to **give education a higher priority** in their national budgets. Explain Many schools in these countries **lack basic resources** such as books, laboratories and qualified teachers, so more funding is needed before quality can improve. Explain Governments can **offer incentives to teachers** who work in remote areas, such as higher salaries, free housing and faster promotion. Example For example, a village school that receives a new science teacher and a small laboratory can finally offer the same subjects as a school in the capital. Link Consequently, investment at home would tackle the main causes of low-quality education.

Body Paragraph 2 · 99 words

Solution In addition, richer countries and international organisations could provide well-planned support. Explain They can fund school buildings, train teachers and supply textbooks and computers, which poorer governments often cannot afford on their own. Explain Technology can also help: online lessons and recorded lectures by excellent teachers can reach village classrooms, provided that schools have electricity and internet access. Example For instance, a school with no physics teacher could use video lessons from an international platform, which would allow its students to learn the same topics as pupils abroad. Link Together, these measures would help children in poorer nations receive a much better education.

Conclusion · 36 words

In conclusion, the education gap between wealthy and poor nations can be narrowed if poorer governments make schools a priority. Practical support from richer countries, including teacher training and online lessons, would speed up this progress.

16. EDU-16 — School uniforms

Some schools are very strict about their school uniforms and the appearance of their pupils, while other schools have a very relaxed dress code. What are the advantages and disadvantages for children of having a school uniform?

Essay type	Advantages vs Disadvantages — Type 1 (discuss, no opinion)
Position	No opinion is asked for, so there is no opinion or plan sentence; both sides are discussed in balance.
Ideas from Idea Bank (Part 3)	Discipline, Behaviour and School Life
Structure	Adv/Disadv guide: Although-intro → BP1 advantages (7 sentences) → BP2 disadvantages (7 sentences) → While-conclusion
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 37 · BP1 131 · BP2 135 · Conclusion 33 · **Total 336**

Introduction · 37 words

Some schools have strict rules about uniforms and appearance, while others allow pupils to dress more freely. Although uniforms can limit self-expression and be costly for some families, they also create equality and a sense of belonging.

Body Paragraph 1 · 131 words

Topic There is little doubt that school uniforms offer considerable advantages to children. Point To begin with, the most significant benefit is that uniforms **create a sense of equality** among pupils. Explain This is because children from rich and poor families look the same, which can reduce bullying about clothes. Example For example, a girl whose parents cannot afford fashionable clothes can join her classmates without feeling ashamed, and she can focus on her lessons instead. Point In addition, a uniform not only gives pupils pride in their school but also prepares them for workplaces with dress codes. Explain As a result of wearing the same colours every day, children develop **a sense of belonging**, which encourages them to respect school rules. Summary Overall, uniforms help to build a fair, united and well-organised school community for every child.

Body Paragraph 2 · 135 words

Topic On the other hand, it cannot be denied that school uniforms also have some drawbacks. Point Firstly, many teenagers feel frustrated when a strict uniform stops them from expressing their personality. Explain Without any choice in how they look, they may feel that their identity is ignored; as a result, some begin to resist other school rules. Example For instance, a creative student who is punished for wearing coloured shoes may lose interest in school, which can harm their learning. Point Secondly, the cost of uniforms can be a serious obstacle, as some schools require specific shops and several sets. Explain If a family has three growing children, it may need new uniforms every year and, consequently, face heavy pressure on its

budget. Summary Overall, these personal and financial problems can make uniforms a burden for some pupils and their parents.

Conclusion · 33 words

In conclusion, many schools still expect pupils to dress identically. While uniforms may restrict children's individuality and strain family budgets, they reduce differences between pupils and make children feel part of their school.

17. EDU-17 — Community work in the curriculum

In some high schools, part of the curriculum requires students to participate in community work such as helping the elderly or disabled. In what way do children benefit from this? Do you think it should be part of the curriculum?

Essay type	Double Question — List + Opinion (benefits + opinion)
Position	Community work teaches empathy and builds confidence; it should be part of the curriculum.
Ideas from Idea Bank (Part 3)	Academic Subjects vs Practical Skills · Discipline, Behaviour and School Life
Structure	Double Question guide (List + Opinion): Answer 1 + answer 2 → BP1 = Q1, List block (P E X P E L) → BP2 = Q2, Opinion block (P E X R L) → Both answers in new words
Reused from Idea Bank	0 sentences (highlighted)
Word count	Intro 35 · BP1 113 · BP2 107 · Conclusion 32 · **Total 287**

Introduction · 35 words

Some high schools require students to do community work, such as helping elderly or disabled people. Community work teaches empathy and builds confidence, and I firmly believe that it should be part of the curriculum.

Body Paragraph 1 · 113 words

Point One of the main benefits of community work is that it teaches **empathy, responsibility and teamwork**. Explain When teenagers help elderly or disabled people, they begin to understand the needs and difficulties of others, so they become more caring and patient. Example For example, a teenager who visits a care home every week may learn to listen calmly to lonely residents, and this experience can even inspire a career in nursing. Point Another important benefit is greater confidence and better communication skills. Explain Students must talk to people of different ages and backgrounds; as a result, they become more comfortable expressing themselves outside the classroom. Link Consequently, community work develops qualities that cannot easily be learned from textbooks.

Body Paragraph 2 · 107 words

Point As for whether it should be part of the curriculum, I firmly believe that it should because only a compulsory programme reaches every student. Explain When community work is optional, only a few motivated students take part, while many others miss its benefits completely. Example For instance, a shy pupil who would never volunteer alone may discover a talent for helping others once the school arranges a weekly visit, which can change their attitude to people. Response Although some people argue that it takes time away from academic subjects, a few hours each month would not harm students' results. Link Therefore, community work deserves a regular place in the school timetable.

Conclusion · 32 words

In conclusion, helping people in need makes young people more caring, responsible and confident. I firmly believe that schools should include it in the curriculum because this ensures that every pupil benefits.

18. EDU-18 — Compulsory after-school activities

The best way to help underachieving pupils is to have compulsory after school activities which they must attend. This way they will become more involved in school and their grades will improve. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Discipline, Behaviour and School Life · Exams, Assessment and Homework
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 49 · BP1 120 · BP2 115 · Conclusion 38 · **Total 322**

Introduction · 49 words

It is sometimes claimed that making weak pupils attend after-school activities is the most effective way to increase their interest in school and raise their marks. I completely disagree with this view because forced activities can reduce motivation and they do not solve the real causes of poor results.

Body Paragraph 1 · 120 words

Point The main reason why I disagree with this idea is that compulsory activities can make struggling pupils even less interested in school. Explain This is because pupils who are forced to stay longer may feel that they are being punished for their low marks. Explain Many of them are already tired after a full day of lessons or have family duties, such as caring for younger siblings; as a result, extra hours at school can feel like a heavy burden. Example For example, a pupil who cares for younger siblings but must also join an evening chess club may dislike school, and this can lead to poorer results. Link Therefore, compulsion is likely to damage the interest that these activities are supposed to create.

Body Paragraph 2 · 115 words

Point Another important reason for my disagreement is that underachievement usually has specific causes that activities cannot solve. Explain When marks fall, the cause is often personal, as a child may have learning difficulties that have not been identified, or may be facing problems at home. Example For instance, a child who cannot read well needs individual support from a trained teacher, which more time on a sports field cannot provide. Response Although some people argue that sports teams, clubs and community projects also give pupils a sense of belonging, this benefit does not help a pupil who simply cannot follow the lessons. Link Consequently, schools should **address the root causes** of each pupil's difficulties instead of adding extra hours.

Conclusion · 38 words

In conclusion, I firmly believe that compulsory after-school programmes are not the best help for underachieving children. They can make pupils feel punished and less motivated, and they also ignore the individual problems that lie behind low marks.

19. EDU-19 — Technology or teachers?

Some people think that schools should invest more money in technology, such as more computers, while others think more money should be spent on teachers. Discuss both views and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Schools should spend more money on teachers.
Ideas from Idea Bank (Part 3)	Technology in Schools: Computers or Teachers?
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 39 · BP1 98 · BP2 110 · Conclusion 42 · **Total 289**

Introduction · 39 words

While some people argue that schools should spend more of their budgets on computers and other technology, others believe that this money should go to teachers. I completely support the latter view because technology cannot replace a good teacher.

Body Paragraph 1 · 98 words

Point On the one hand, people who support investment in technology argue that it makes lessons more **interactive and engaging**. Explain Using videos, animations and simulations, teachers can bring

difficult topics to life, which a textbook alone cannot do. Explain Difficult processes can be shown on a screen; as a result, students understand them more quickly. Example For example, a science class that cannot safely perform a chemical reaction can watch it on a smart board, and this experience often stays longer in students' memories. Link For this reason, many people believe that computers are a sensible use of a school's limited money.

Body Paragraph 2 · 110 words

Point On the other hand, I firmly believe that schools should fund teachers first because technology cannot replace their human qualities. Explain When students lose confidence, a teacher can notice the problem and adapt the lesson, and no computer program can offer the same support. Example For instance, a village pupil who has lost confidence in mathematics may give up on recorded lessons, whereas a patient teacher can notice the difficulty and explain it differently. Response Although some people argue that technology makes lessons more engaging, even the best equipment is wasted if teachers have never been trained to use it. Link Consequently, funding well-trained teachers is the most effective way to improve students' learning.

Conclusion · 42 words

In conclusion, people hold different views on whether schools should fund digital equipment or teaching staff. While technology can make lessons more interesting, I firmly believe that teachers deserve the

investment first because no device can offer the same guidance and encouragement.

20. EDU-20 — Parents vs teachers: who influences more?

Some people think that parents have the greatest influence on their child's academic development, while others think that a child's teacher has more influence. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Parents have more influence on a child's academic development.
Ideas from Idea Bank (Part 3)	The Role of Teachers and Parents
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 38 · BP1 105 · BP2 107 · Conclusion 38 · **Total 288**

Introduction · 38 words

While some people argue that teachers have the greatest effect on a child's academic progress, others believe that parents have more influence. I completely support the latter view because parents are a child's **first and most important teachers**.

Body Paragraph 1 · 105 words

Point On the one hand, people who support the role of teachers argue that they have professional training and **subject knowledge** that

most parents do not have. Explain They know how to explain difficult concepts, how to organise learning step by step and how to assess progress. Explain Difficult subjects can be made simple by a skilled teacher; as a result, students make steady progress. Example For example, a student who is weak at mathematics may learn to enjoy the subject with the help of a patient teacher, and this can improve their results. Link For this reason, many people believe that teachers have the greatest influence on academic development.

Body Paragraph 2 · 107 words

Point On the other hand, I firmly believe that parents have more influence because study habits and attitudes begin at home. Explain When parents read with their children and answer their questions, they develop curiosity long before school starts, and this love of learning can last for years. Example For instance, a child whose parents read stories every night may arrive at school already curious about books, which makes learning to read much easier. Response Although some people argue that teachers have better subject knowledge, even the best teacher struggles to help a student whose family does not **value education**. Link Consequently, parents have the stronger effect on a child's academic development.

Conclusion · 38 words

In conclusion, people hold different views on whether parents or teachers have more influence on academic development. While teachers bring valuable knowledge and skills, I firmly believe that parents matter more because good study habits begin at home.

21. EDU-21 — Single-sex or mixed schools?

In some countries, girls and boys are educated in different schools rather than in the same school. What are the advantages and disadvantages of this?

Essay type	Advantages vs Disadvantages — Type 1 (discuss, no opinion)
Position	No opinion is asked for, so there is no opinion or plan sentence; both sides are discussed in balance.
Ideas from Idea Bank (Part 3)	Discipline, Behaviour and School Life
Structure	Adv/Disadv guide: Although-intro → BP1 advantages (7 sentences) → BP2 disadvantages (7 sentences) → While-conclusion
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 31 · BP1 135 · BP2 135 · Conclusion 33 · **Total 334**

Introduction · 31 words

In some countries, boys and girls study in separate schools. Although single-sex schools may limit social skills and weaken respect between boys and girls, they can also improve concentration and confidence.

Body Paragraph 1 · 135 words

Topic There is little doubt that **single-sex schools** offer considerable advantages to some students. Point To begin with, the most significant

benefit is that pupils may be less distracted and more confident to participate. Explain This is because teenagers who study only with their own sex often feel less pressure about appearance, which leaves more energy for learning. Example For example, a shy girl who worried about her looks in a mixed class may focus better at a girls' school, and her confidence may grow. Point In addition, many parents in conservative communities feel more comfortable when their daughters attend girls-only schools. Explain As a result of this trust, more girls stay in education and may be more likely to choose subjects like physics and engineering. Summary Overall, separate schools can give many students a calmer and more focused place to learn.

Body Paragraph 2 · 135 words

Topic On the other hand, it cannot be denied that single-sex schools also have some drawbacks. Point Firstly, many students miss the chance to develop social skills with the opposite sex. Explain Without daily contact with the opposite sex, they often feel nervous in mixed groups; as a result, teamwork at university or work can be difficult. Example For instance, a young engineer who has never worked with women may feel uncomfortable in a mixed office, which can slow his progress. Point Secondly, separation can be a serious obstacle to equality, as it may keep old gender stereotypes alive. Explain If boys and girls rarely share classrooms, they may not learn to **respect the opposite sex** and, consequently, carry unfair attitudes into adult life. Summary Overall, these social and attitude problems can make the move into adult society harder for some students.

Conclusion · 33 words

In conclusion, educating boys and girls apart remains common in many countries. While separate schools may weaken social skills and respect between the sexes, they can help pupils focus and feel more confident.

22. EDU-22 — Fewer women in university science

In nearly all science courses at university, there are significantly more male students than female students. What is the reason for this? What could be done to balance out the numbers?

Essay type	Cause and Solution
Position	Causes: gender stereotypes and a lack of female role models. Solutions: schools challenge stereotypes; universities and companies make women scientists visible.
Ideas from Idea Bank (Part 3)	Education and Inequality · Changing gender roles (see Chapter 06 Gender Equality at Work)
Structure	Cause/Problem + Solution guide: 2 causes or problems + 2 solutions → BP1 (P E X P E L) → BP2, each solution fixing one point (N E X N E L) → Same ideas in new words
Reused from Idea Bank	0 sentences (highlighted)
Word count	Intro 38 · BP1 120 · BP2 109 · Conclusion 31 · **Total 298**

Introduction · 38 words

In most university science courses, male students greatly outnumber female students. This is mainly because of gender stereotypes and a lack of female role models, but better support at school and visible women scientists can balance the numbers.

Body Paragraph 1 · 120 words

Point One of the main causes of this imbalance is **gender stereotypes**, which shape girls' choices from an early age. Explain Many girls are told, directly or indirectly, that science and engineering are "men's subjects", so they lose confidence in physics and mathematics even when they perform well. Example For example, a talented girl who is advised by relatives to become a teacher rather than an engineer may never apply for a science course, and this choice can shape her whole career. Point Another important cause is the lack of female **role models** in science. Explain When young women rarely see women working as scientists or engineers, these careers seem less possible and attractive. Link Consequently, many capable women choose other subjects before they reach university.

Body Paragraph 2 · 109 words

Solution The most effective solution is for schools to challenge these stereotypes from an early age. Explain If teachers give boys and girls equal attention in science lessons and encourage girls to join science clubs, girls can build confidence in these subjects. Example For instance, a talented girl who wins a school science competition may feel able to choose engineering, which makes family pressure easier to resist. Solution In addition, universities and companies could make women scientists more visible. Explain When successful female scientists speak to students and offer mentoring, schoolgirls can see that such careers are realistic. Link Together, these measures would change attitudes and increase the number of women in university science courses.

Conclusion · 31 words

In conclusion, women are underrepresented in science because of social expectations and too few female examples to follow. Early encouragement and greater contact with women scientists would gradually correct this imbalance.

23. EDU-23 — Learning in old age

Some people think that it is beneficial for old people to learn something new while others believe that once a person is past 65 years of age it is too late to learn. What is your opinion?

Essay type	Discussion (both views + opinion)
Position	It is never too late to learn; learning benefits older people.
Ideas from Idea Bank (Part 3)	Lifelong Learning and Adult Education
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	6 sentences (highlighted)
Word count	Intro 39 · BP1 100 · BP2 106 · Conclusion 40 · **Total 285**

Introduction · 39 words

While some people argue that it is too late to learn anything new after the age of 65, others believe that older people benefit from new knowledge. I completely support the latter view because learning keeps the mind active.

Body Paragraph 1 · 100 words

Point On the one hand, people who think it is too late argue that learning becomes much harder in old age. Explain Elderly people may also have health problems, such as poor eyesight or hearing, which

make learning more difficult. Explain Slow progress can also be discouraging; as a result, they feel they are **too old to learn**. Example For example, a 70-year-old with poor eyesight who struggles in a computer class may give up after a few lessons, and this can confirm the belief that learning is impossible. Link For this reason, many people believe that learning new skills is only for the young.

Body Paragraph 2 · 106 words

Point On the other hand, I firmly believe that learning is beneficial at any age because learning keeps the mind active, which may help to **slow down memory loss**. Explain When older people learn to use new technology, they also stay connected and independent, and this gives them a sense of purpose after retirement. Example For instance, a 67-year-old who learns to use a smartphone can video-call grandchildren abroad, which makes life much less lonely. Response Although some people argue that older learners make slow progress, this problem can be solved by classes with patient teachers and a relaxed pace. Link Consequently, age should never stop people from learning something new.

Conclusion · 40 words

In conclusion, people hold different views on whether learning new things after 65 is useful or too late. While health problems can make study harder, I firmly believe that older people benefit greatly because learning keeps them active and connected.

24. EDU-24 — The role of a teacher

It is thought by some that a school teacher's role is to motivate and inspire students. However, other people believe that a teacher's primary role is to pass on knowledge. What do you think is the role of a teacher?

Essay type	Discussion (both views + opinion)
Position	A teacher's main role is to motivate and inspire students.
Ideas from Idea Bank (Part 3)	The Role of Teachers and Parents · Technology in Schools
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 37 · BP1 99 · BP2 107 · Conclusion 39 · **Total 282**

Introduction · 37 words

While some people argue that a teacher's main duty is to pass on knowledge, others believe that teachers should motivate and inspire students. I completely support the latter view because information is now easy to find online.

Body Paragraph 1 · 99 words

Point On the one hand, people who support knowledge-based teaching argue that teachers have professional training and **subject knowledge** that most parents do not have. Explain They know how to

explain difficult concepts, how to organise learning step by step and how to assess progress. Explain Key facts must be understood before students can move forward; as a result, clear explanations are essential. Example For example, a mathematics teacher must explain a formula accurately before students can solve problems, and this basic knowledge is needed in every exam. Link For this reason, many people believe that passing on knowledge is a teacher's primary role.

Body Paragraph 2 · 107 words

Point On the other hand, I firmly believe that inspiring students matters more because information is now available online within seconds. Explain When facts are so easy to find, students need a teacher who can motivate a student who has lost confidence and show why a subject matters. Example For instance, a bored pupil whose teacher connects science to real life may become an enthusiastic learner, which can change their attitude to school for years. Response Although some people argue that students need accurate facts first, those facts are quickly forgotten if pupils have no interest in learning them. Link Consequently, motivating students is the most important part of a teacher's job.

Conclusion · 39 words

In conclusion, people hold different views on whether teachers should mainly pass on knowledge or inspire their students. While clear explanations are useful, I firmly believe that teachers should **motivate and inspire** because information can now be found online.

25. EDU-25 — Less handwriting in schools

Fewer schools are requiring children to learn and improve their handwriting skills. Do the advantages outweigh the disadvantages of this trend?

Essay type	Advantages vs Disadvantages — Type 2 (outweigh)
Position	The disadvantages outweigh the advantages, so the advantages go first in the Although and While sentences and the disadvantages go after the comma.
Ideas from Idea Bank (Part 3)	Technology in Schools: Computers or Teachers? · Exams, Assessment and Homework
Structure	Adv/Disadv guide: Although-intro → BP1 advantages (7 sentences) → BP2 disadvantages (7 sentences) → While-conclusion
Reused from Idea Bank	0 sentences (highlighted)
Word count	Intro 48 · BP1 132 · BP2 134 · Conclusion 45 · **Total 359**

Introduction · 48 words

In recent years, many schools have stopped making handwriting a compulsory part of the curriculum. Although this change can save time for **digital skills** and suit a computer-based world, it often weakens children's memory and exam performance. In my opinion, the disadvantages of this trend outweigh the advantages.

Body Paragraph 1 · 132 words

Topic There is little doubt that less handwriting practice offers considerable advantages to pupils. Point To begin with, the most significant benefit is the extra time that schools can spend on computer lessons. Explain This is because most writing in workplaces is done on computers, which makes fast typing an essential skill. Example For example, a pupil who learns to type quickly at primary school can later complete assignments far more efficiently, which saves hours every week. Point In addition, typed work is not only easier to edit and share but also kinder to children with poor handwriting. Explain As a result of these tools, pupils who once felt embarrassed by messy writing can present their ideas clearly, which builds their confidence. Summary Overall, the shift towards typing prepares children well for a digital world of study and work.

Body Paragraph 2 · 134 words

Topic On the other hand, it cannot be denied that this trend also has some drawbacks. Point Firstly, many children lose an important learning tool when they stop writing by hand. Explain Writing by hand makes them think carefully about each word; as a result, they remember information better than when they type. Example For instance, a student who copies key notes by hand before an exam may recall them more easily, which can improve their grade. Point Secondly, poor handwriting can be a serious obstacle, as most public exams in Bangladesh are still written on paper. Explain If examiners cannot read a pupil's answers, they may award fewer marks and, consequently, the pupil may lose places at good colleges.

Summary Although some pupils still practise writing at home, these learning and exam problems often harm their grades and future chances.

Conclusion · 45 words

In conclusion, handwriting now receives less attention in many classrooms. While this trend can give pupils more time for typing and computer skills, it often weakens their memory and puts them at a disadvantage in exams. Therefore, I believe that the drawbacks outweigh the benefits.
