IELTS Writing Task 2 — Model Answers

Chapter 03 · Environment · 20 IELTS Liz Questions

Band 7+ sample essays · Every essay follows its essay-type guide · PEEL(R) paragraphs · Ideas and sentences from your Environment Idea Bank

How to Use This Sheet

এই sheet কীভাবে পড়বে

1. প্রথমে প্রশ্নটি পড়ো এবং **নিজে 5 মিনিটে একটি পরিকল্পনা করো** (Idea Bank Part 2 পদ্ধতিতে)। তারপর model answer-এর "Plan" box-এর সাথে মিলিয়ে দেখো।
2. Model essay পড়ার সময় রঙিন label-গুলো লক্ষ করো — প্রতিটি body paragraph কীভাবে **Point → Explain → Example → Link** ধাপে এগোয়।
3. **Bold** করা collocation-গুলো তোমার Environment Idea Bank-এর Part 4 থেকে নেওয়া — এগুলো খাতায় লিখে নিজের বাক্যে ব্যবহার করো।
4. প্রতিদিন 2–3টি essay পড়ো। একটি essay বেছে নিয়ে, model না দেখে, নিজের ভাষায় আবার লেখো (40 মিনিট)।
5. প্রতিটি essay-র শব্দসংখ্যা দেওয়া আছে। Advantages & Disadvantages essay-গুলো আলাদা guide মেনে লেখা: **Intro 40–50 · BP1 120–135 · BP2 120–135 · Conclusion 35–45 = 330–360**; মতামত না চাইলে (Type 1) **Intro 30–40 · Conclusion 25–35 = 310–340**। Agree / Disagree essay-গুলো আলাদা guide মেনে লেখা: **Intro 35–50 · BP1 100–120 · BP2 100–120 · Conclusion 35–55 = 270–345**। Discuss Both Views essay-গুলো আলাদা guide মেনে লেখা: **Intro 35–45 · BP1 90–120 · BP2 90–120 · Conclusion 35–45 = 260–299**। Cause/Problem + Solution essay-গুলো আলাদা guide মেনে লেখা: **Intro 30–40 · BP1 90–120 · BP2 90–120 · Conclusion 30–40 = 260–300**। Double Question essay-গুলো আলাদা

guide মেনে লেখা: **Intro 30–40 · BP1 90–120 · BP2 90–120 · Conclusion 30–40 = 260–300**।

6. Part 6-এর বাংলা essay (ENV-13, ENV-10, ENV-11) অনুবাদ করে থাকলে, এখানকার model-এর সাথে তোমার অনুবাদ মিলিয়ে দেখো। এই বাংলা essay-গুলো এখানকার English model-এর অনুবাদ হিসেবে লেখা, তাই একই কাঠামো ও একই idea পাবে।

হালকা সবুজ দাগ দেওয়া বাক্য = তোমার Environment Idea Bank থেকে হুবহু বা প্রায় হুবহু নেওয়া। এই sheet-এ মোট **72টি** এমন বাক্য আছে। এগুলো তুমি আগেই পড়েছ, তাই পড়তে কম সময় লাগবে — আর দেখবে, Idea Bank-এর বাক্যগুলো সরাসরি essay-তে ব্যবহার করা যায়। পরীক্ষায় তুমিও ঠিক এভাবে নিজের মুখস্থ করা বাক্য ব্যবহার করতে পারবে।

The PEEL(R) paragraph method

Label	Meaning	What the sentence does	Typical linkers
Point	Topic sentence	States the main idea of the paragraph	The main reason… / Firstly… / However, I believe…
Explain	Explanation	Says **why** or **how** the point is true (often 2–3 sentences)	This is because… / Since… / As a result…
Example	Example	Gives a specific, realistic example	For example… / For instance… / In Bangladesh…

Label	Meaning	What the sentence does	Typical linkers
Link	Link / result	Connects back to the question or shows the result	Therefore… / As a result… / In this way…
Response	Response to the other side	Admits the opposite view, then answers it (the **R** in PEELR)	Admittedly… / Although… / However, …
Topic	Topic sentence (Adv/Disadv only)	Opens the paragraph with a fixed sentence	There is little doubt that… / On the other hand, it cannot be denied that…
Summary	Summary (Adv/Disadv only)	Sums up the paragraph in general words	Overall, … / Although these…
Solution	Solution (Cause/Problem + Solution only)	Says who acts and what they do	The most effective solution is for… / In addition, …

> **PEEL বনাম PEELR:** সাধারণ body paragraph-এ **PEEL** যথেষ্ট। কিন্তু opinion বা discussion essay-তে যখন বিপরীত মতকে মেনে নিয়ে জবাব দিতে হয় ("Admittedly… However…"), তখন **R (Response)** যোগ করো — এতে লেখা আরও পরিণত ও যুক্তিপূর্ণ দেখায়, যা Band 7-এর জন্য গুরুত্বপূর্ণ।

> **Advantages & Disadvantages essay (1টি) — নতুন নির্দিষ্ট কাঠামো** (IELTS_Advantages_Disadvantages_Essay_Guide.md

অনুযায়ী):

- **Introduction:** প্রশ্নের paraphrase → **Although** + যে দিক তুমি সমর্থন করো না (2 point), + যে দিক তুমি সমর্থন করো (2 point), but ছাড়া → মতামত (শুধু প্রশ্ন মতামত চাইলে)।
- **Body 1 = সুবিধা, Body 2 = অসুবিধা — প্রতিটিতে ঠিক 7টি বাক্য:** Topic → Point → Explain → Example → Point → Explain → Summary ।
- **Body 1 linker:** There is little doubt that... → To begin with → This is because → For example → In addition → As a result → Overall।
- **Body 2 linker:** On the other hand, it cannot be denied that... → Firstly → "; as a result," → For instance → Secondly → If... consequently → শেষ বাক্য: Type 1 হলে Overall, these...; সুবিধার পক্ষে হলে Although these [problems]..., most...; অসুবিধার পক্ষে হলে Although some [people]..., these [problems] often...।
- **Conclusion:** In conclusion + নতুন paraphrase → **While** + দুই দিক, Although বাক্যের একই ক্রমে → মতামত আবার বলো (শুধু প্রশ্ন মতামত চাইলে)।
- 🚫 **প্রশ্ন মতামত না চাইলে (Type 1):** Introduction ও Conclusion-এ মাত্র **2টি বাক্য**। মতামত লিখবে না, আর "This essay will examine both the benefits and the drawbacks..." ধরনের plan sentence-ও লিখবে না — এটি মুখস্থ করা বাক্য মনে হয় এবং নতুন কোনো idea যোগ করে না। Introduction শেষ হবে Although বাক্যে, essay শেষ হবে While বাক্যে।
- ⭐ **Emphasis rule:** Although/While বাক্যে পাঠক সবসময় **শেষের idea (comma-র পরের অংশ)**-কে তোমার মত হিসেবে ধরে। তাই সুবিধার পক্ষে হলে আগে অসুবিধা, পরে সুবিধা; অসুবিধার

পক্ষে হলে আগে সুবিধা, পরে অসুবিধা। Type 1-এ (মতামত নেই) সাধারণত আগে অসুবিধা, পরে সুবিধা।

Agree / Disagree essay (9টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Agree_Disagree_Essay_Guide.md অনুযায়ী):

- 🚫 **কখনো আংশিক উত্তর নয়:** শুরু থেকে শেষ পর্যন্ত একটিই পক্ষ। "partly agree", "largely agree", "to some extent" লিখবে না।
- **Introduction (2টি বাক্য):** প্রশ্নের paraphrase → I completely agree/disagree with this view because + Idea 1 + Idea 2।
- **Body 1 = Idea 1:** Point → Explain → Explain → Example → Link ।
- **Body 1 linker:** The main reason why I agree/disagree with this idea is that… → This is because… → "; as a result," → For example… → Therefore…।
- **Body 2 = Idea 2:** Point → Explain → Example → Response → Link ।
- **Body 2 linker:** Another important reason for my agreement/disagreement is that… → When… → For instance… → Although some people argue that…, [তোমার পক্ষ] → Consequently…।
- **Conclusion (2টি বাক্য):** In conclusion, I firmly believe that… → Idea 1 ও Idea 2 নতুন শব্দে। নতুন কোনো idea নয়।
- ⭐ **Response বাক্য:** বিপরীত মত থাকবে Although অংশে, আর তোমার পক্ষ থাকবে comma-র পরে, but ছাড়া। তাই উত্তর আংশিক হয় না।

Discuss Both Views essay (5টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Discuss_Both_Views_Essay_Guide.md অনুযায়ী):

- 🚫 **কখনো আংশিক উত্তর নয়:** একটিই স্পষ্ট মত। "both views are important", "it depends" লিখবে না।
- ⭐ **Order rule:** বিপরীত মত সবসময় আগে, তোমার মত সবসময় শেষে। তাই "the latter view" সবসময় তোমার পক্ষকেই বোঝায়।
- **Introduction:** While some people argue that [বিপরীত মত], others believe that [তোমার মত]. → I completely support the latter view because [মূল কারণ].
- **Body 1 = বিপরীত মত ("I" ছাড়া):** Point → Explain → Explain → Example → Link ।
- **Body 1 linker:** On the one hand, people who… argue that… → For example… → For this reason, many people believe that…।
- **Body 2 = তোমার মত:** Point → Explain → Example → Response → Link ।
- **Body 2 linker:** On the other hand, I firmly believe that… because… → For instance… → Although some people argue that [Body 1-এর যুক্তি], [তোমার পক্ষ] → Consequently…।
- **Conclusion (2টি বাক্য):** In conclusion, people hold different views on whether… → While [বিপরীত মত], I firmly believe that [তোমার মত] because [কারণ]।
- **শব্দসংখ্যা:** সবসময় 300-এর নিচে। সহজ হিসাব: 40 + 100 + 100 + 40 = 280।

Cause/Problem + Solution essay (3টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Cause_Problem_Solution_Essay_Guide.md অনুযায়ী):

- ⭐ **ধরন চেনো:** শুধু প্রথম প্রশ্নটি দেখো। কেন ঘটছে জানতে চাইলে **Cause essay**, কী ক্ষতি হচ্ছে জানতে চাইলে **Problem essay**।

প্রশ্নে "this problem" থাকলেই সেটি Problem essay হয় না।

- 🚫 **মতামত নয়:** প্রশ্ন না চাইলে "I think" বা "In my opinion" লিখবে না। "This essay will..." বাক্যও লিখবে না।
- **Introduction (2টি বাক্য):** paraphrase → 2টি কারণ বা সমস্যা, but + 2টি সমাধান।
- **Body 1 = 2টি কারণ বা সমস্যা:** Point → Explain → Example → Point → Explain → Link ।
- **Body 2 = 2টি সমাধান:** Solution → Explain → Example → Solution → Explain → Link ।
- ⭐ **Mirror rule:** সমাধান 1 ঠিক করে কারণ বা সমস্যা 1, সমাধান 2 ঠিক করে কারণ বা সমস্যা 2। প্রতিটি সমাধানে থাকবে কে করবে, কী করবে, আর তাতে কীভাবে কাজ হবে (WHO + WHAT + HOW)।
- **Conclusion (2টি বাক্য):** কারণ বা সমস্যা নতুন শব্দে → সমাধান নতুন শব্দে + চূড়ান্ত ফল। নতুন কোনো idea নয়।
- **শব্দসংখ্যা:** সহজ হিসাব: 35 + 105 + 105 + 35 = 280।
- **একই পরিবারের অন্য প্রশ্ন (guide Section 14):** শুধু সমাধান, দুই পক্ষের সমাধান, বা শুধু সমস্যা চাইলে প্রতিটি body paragraph-এ একটিই idea: Point / Solution → Explain → Explain → Example → Link । মতামত নয়।

Double Question essay (2টি) — নতুন নির্দিষ্ট কাঠামো (IELTS_Double_Question_Essay_Guide.md অনুযায়ী):

- ⭐ **ভাগ করো:** Q1 যাবে Body 1-এ, Q2 যাবে Body 2-এ, প্রশ্নের ক্রমেই। প্রতিটি প্রশ্ন আলাদা করে পরীক্ষা করো।
- **পক্ষ বেছে নিতে হলে (হ্যাঁ/না, ভালো/খারাপ) = Opinion block:** Point (I firmly believe that... because...) → Explain →

Example → Response (Although some people argue that...) → Link (Therefore...)। Body 2-তে শুরু: As for whether...

- **কেন / কী / কীভাবে জানতে চাইলে = List block (2টি idea):** Point → Explain → Example → Point → Explain → Link (Consequently... / Together, these measures would...)। সমাধান হলে Point-এর জায়গায় Solution । List block-এ "I" লিখবে না।
- ⭐ **"do you think" ফাঁদ:** প্রশ্নের প্রথম শব্দ দেখো। *Why do you think...?* আসলে কারণ চায় (List), মত নয়।
- ⭐ **"other" ফাঁদ:** প্রশ্নে *other* থাকলে প্রশ্নে দেওয়া idea বাদ দিয়ে নতুন idea লেখো।
- **Introduction (2টি বাক্য):** paraphrase → [উত্তর 1], and [উত্তর 2]। মতের কারণ Introduction-এ নয়, Opinion block-এর শুরুতে।
- **Conclusion (2টি বাক্য):** In conclusion, [উত্তর 1 নতুন শব্দে]. [উত্তর 2 নতুন শব্দে]. কোনো প্রশ্নই মত না চাইলে (List + List) কোথাও "I" নয়।
- **শব্দসংখ্যা:** সহজ হিসাব: 35 + 105 + 105 + 35 = 280।

18	TOU-09	Regular international flights	Advantages vs Disadvantages — Type 2 (outweigh)
19	TOU-10	Raising the cost of international flights	Agree / Disagree
20	HOU-02	Trees or housing on vacant city land?	Discussion (both views + opinion)

Model Answers

1. ENV-01 — Can human damage to nature be reversed?

Human activity has had a negative impact on plants and animals around the world. Some people think that this cannot be changed, while others believe actions can be taken to bring about a change. Discuss both and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Determined action can still bring about real change.
Ideas from Idea Bank (Part 3)	Wildlife, Endangered Species and Biodiversity · Deforestation and Natural Places
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 41 · BP1 98 · BP2 107 · Conclusion 37 · **Total 283**

Introduction · 41 words

Human activity has seriously damaged plants and animals worldwide. While some people argue that this damage cannot be reversed, others believe that determined action can still change the situation. I completely support the latter view because many damaged areas can recover.

Body Paragraph 1 · 98 words

Point On the one hand, people who hold the pessimistic view argue that the damage is too great to stop. Explain As human populations grow, forests are cleared for farms, roads, housing and industry, leaving animals with nowhere to live and find food. Explain Natural habitats are being lost faster than they can recover; as a result, many species are in danger. Example For example, the Sundarbans mangrove forest is home to the Bengal tiger, but pressure from human activity and rising sea levels threatens this unique environment. Link For this reason, many people believe that the damage to nature cannot be changed.

Body Paragraph 2 · 107 words

Point On the other hand, I firmly believe that action can bring change because large-scale tree-planting programmes, especially with native species, can restore damaged land. Explain When wildlife is protected by **strict anti-poaching laws** and local people are employed as forest guards, illegal hunting falls, and damaged forests can recover. Example For instance, a village guide who earns money from eco-tourism has a strong reason to protect the forest, which helps wildlife to return. Response Although some people argue that growing populations will always destroy nature, people can also choose to protect it when they gain from doing so. Link Consequently, the harm done to plants and animals can still be changed.

Conclusion · 37 words

In conclusion, people hold different views on whether the damage to plants and animals can be reversed. While growing populations put

great pressure on nature, I firmly believe that change is possible because protected forests can recover.

2. ENV-02 — Is wildlife protection a waste of government money?

It is often said that governments spend too much money on projects to protect wildlife, while there are other problems that are more important. Do you agree or disagree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Wildlife, Endangered Species and Biodiversity · Economic Growth versus Environmental Protection
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	6 sentences (highlighted)
Word count	Intro 42 · BP1 106 · BP2 120 · Conclusion 38 · **Total 306**

Introduction · 42 words

It is often said that governments spend too much on protecting wildlife when more serious problems need their attention. I completely disagree with this view because conservation protects the natural systems that humans depend on and also creates jobs for local communities.

Body Paragraph 1 · 106 words

Point The main reason why I disagree with this idea is that protecting wildlife also protects the natural systems that humans need. Explain This is because every species plays a role in its ecosystem, and if one species disappears, the whole system can be affected. Explain Bees and other insects pollinate many of the crops we eat; as a result, losing them would directly threaten the food supply of millions of people. Example For example, a village that loses its bees may harvest far less fruit and fewer vegetables, and this can leave many families without enough food. Link Therefore, money spent on wildlife is also money spent on human survival.

Body Paragraph 2 · 120 words

Point Another important reason for my disagreement is that wildlife projects bring direct economic benefits to people. Explain When visitors come to see rare animals, they spend money, because national parks and wildlife reserves attract tourists, who pay for guides, hotels and food, creating jobs for local people. Example For instance, a villager near a forest reserve who works as a guide can earn a steady income, which gives their family a reason to protect the animals. Response Although some people argue that a hospital or school should come before a tiger reserve, the money spent on conservation is usually a small part of national budgets. Link Consequently, cutting these projects would save very little money and cost poor communities a valuable source of income.

Conclusion · 38 words

In conclusion, I firmly believe that public money spent on wildlife is not wasted, even when other serious problems exist. Healthy ecosystems support human life, and nature-based tourism also gives poor communities a reliable way to earn money.

3. ENV-03 — Increasing the cost of fuel

Some people think the best way to solve global environmental problems is to increase the cost of fuel. To what extent do you agree or disagree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Climate Change: Causes and Who Is Responsible · Renewable Energy and Fossil Fuels · Cities: Air Pollution, Traffic and Green Spaces
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 42 · BP1 115 · BP2 114 · Conclusion 41 · **Total 312**

Introduction · 42 words

It is sometimes claimed that making fuel more expensive is the most effective answer to the world's environmental problems. I completely disagree with this view because higher prices hurt poor families most and they do nothing to solve many other environmental problems.

Body Paragraph 1 · 115 words

Point The main reason why I disagree with this idea is that higher fuel prices hurt poor families most. Explain This is because poor households spend a larger share of their income on transport and

cooking fuel than wealthy households do. Explain The prices of food and other goods also rise when transport becomes more expensive; as a result, these families may have to spend less on meals or school fees. Example For example, a rickshaw puller who must pay more for rice and vegetables may have to take a child out of school, while rich drivers will hardly notice the difference. Link Therefore, this policy places the heaviest burden on those who have done least to cause the problem.

Body Paragraph 2 · 114 words

Point Another important reason for my disagreement is that fuel prices do nothing to solve many other environmental problems. Explain When governments rely only on fuel costs, they ignore issues that have little connection with petrol, such as deforestation, plastic waste and illegal hunting. Example For instance, a higher diesel price will not stop a company from dumping plastic in a river or cutting down a forest, which needs strict laws instead. Response Although some people argue that expensive fuel makes people drive less, a person cannot take the bus if there is no reliable bus service. Link Consequently, governments should create the rules and the infrastructure that make green choices easy and affordable instead of simply raising prices.

Conclusion · 41 words

In conclusion, I firmly believe that raising the price of fuel is not the best way to protect the global environment. This policy is unfair to

low-income households, and it also leaves problems such as plastic waste and forest loss untouched.

4. ENV-04 — An international car-free day

Some people think an international car-free day is an effective way to reduce air pollution. Others think there are more effective ways to do this. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Other measures are more effective than a car-free day.
Ideas from Idea Bank (Part 3)	Cities: Air Pollution, Traffic and Green Spaces · Environmental Education and Individual Action
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 38 · BP1 102 · BP2 113 · Conclusion 41 · **Total 294**

Introduction · 38 words

While some people argue that an international car-free day can reduce air pollution effectively, others believe that there are better solutions. I completely support the latter view because one day cannot solve a problem that exists all year.

Body Paragraph 1 · 102 words

Point On the one hand, people who support car-free days argue that they **raise public awareness** of dirty air. Explain Some cities have tried car-free days or charges for driving in the city centre, which

raise awareness and reduce traffic. Explain Streets are closed to traffic for a day; as a result, people see how much cars affect their city. Example For example, a family who walks or cycles on a car-free day may discover that short journeys do not need a car, and this can change their habits. Link For this reason, many people believe that such a day is an effective way to reduce pollution.

Body Paragraph 2 · 113 words

Point On the other hand, I firmly believe that other measures are more effective because air pollution continues all year. Explain When a car-free day ends, drivers simply return to their cars, but governments can **invest in public transport**, such as metro rail systems and reliable bus networks. Example For instance, a worker in Dhaka who can take the metro rail to the office every day may leave their motorbike at home, which reduces pollution all year. Response Although some people argue that a car-free day raises awareness, awareness alone cannot help people who have no other way to travel. Link Consequently, if cities invest in public transport, fewer people will drive, and the air will become cleaner.

Conclusion · 41 words

In conclusion, people hold different views on whether a car-free day is the best way to reduce air pollution. While such a day can raise awareness, I firmly believe that other solutions are better because public transport reduces traffic every day.

5. ENV-05 — Global warming or deforestation?

While some people consider global warming to be the most pressing environmental problem which we have at the moment, others believe that deforestation has a more devastating impact on our world. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Global warming is the more urgent problem.
Ideas from Idea Bank (Part 3)	Deforestation and Natural Places · Climate Change: Causes and Who Is Responsible
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 36 · BP1 106 · BP2 102 · Conclusion 39 · **Total 283**

Introduction · 36 words

While some people argue that deforestation is doing the most damage to our planet, others believe that global warming is the most urgent environmental problem. I completely support the latter view because it affects every country.

Body Paragraph 1 · 106 words

Point On the one hand, people who focus on forests argue that deforestation causes immediate and visible damage. Explain Large

areas of forest are cleared to create farmland for crops and cattle, or to grow plantation crops such as palm oil. Explain Without tree roots to hold the soil, heavy rain can wash it away, causing **soil erosion**, floods and landslides; as a result, homes and lives can be lost. Example For example, when hills are cleared for housing, nearby villages may be buried by landslides in the rainy season, and whole families may lose their homes. Link For this reason, many people believe that deforestation has the more devastating impact.

Body Paragraph 2 · 102 words

Point On the other hand, I firmly believe that global warming is the more pressing problem because it threatens the whole planet. Explain When temperatures rise, storms and droughts become stronger, and farmers in many regions suffer from unpredictable rainfall, which **threatens food security**. Example For instance, low-lying countries such as Bangladesh face more frequent floods and cyclones, and salt water is entering farmland in coastal areas, making it harder to grow crops. Response Although some people argue that cleared forests cause faster damage, these losses are mainly local, whereas rising temperatures harm people in every region. Link Consequently, global warming is the greatest environmental threat today.

Conclusion · 39 words

In conclusion, people hold different views on whether deforestation or global warming is the more serious problem. While cutting down

forests causes severe local damage, I firmly believe that global warming is worse because it affects the whole world.

6. ENV-06 — Local problems or global warming?

The government should reduce the amount of money spent on local environmental problems and instead increase funding into urgent and more threatening issues such as global warming. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Climate Change: Causes and Who Is Responsible · Water, Farming and Food · Global Problems and International Cooperation
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 43 · BP1 109 · BP2 116 · Conclusion 37 · **Total 305**

Introduction · 43 words

It is often argued that governments should cut spending on local environmental problems and use this money for more serious threats such as global warming. I completely disagree with this view because local pollution damages people's health and it also destroys their livelihoods.

Body Paragraph 1 · 109 words

Point The main reason why I disagree with this idea is that local pollution directly damages people's health every day. Explain This is because breathing polluted air every day can cause asthma, lung disease and heart problems, and children and elderly people are especially vulnerable. Explain Dirty rivers also spread disease in communities that have no other water supply; as a result, families face high medical bills and hospitals become overcrowded. Example For example, a family that drinks from a polluted river may spend much of its income on medicine, and this harm is happening now, not decades in the future. Link Therefore, local problems are urgent because they are already harming people today.

Body Paragraph 2 · 116 words

Point Another important reason for my disagreement is that local environmental damage destroys people's livelihoods. Explain When governments ignore this damage, ordinary workers suffer first, as when rivers are poisoned, fishing communities lose their income, and when soil is damaged, farmers produce less food. Example For instance, a fishing family whose river is full of factory waste may have to move to a city slum, which creates new social problems. Response Although some people argue that global warming is a far greater threat, local problems, like a polluted river or a lack of parks in a city, are usually best solved by national and local authorities. Link Consequently, governments must keep funding local projects, because nobody else will do this work.

Conclusion · 37 words

In conclusion, I firmly believe that money for local environmental projects should not be moved to global issues. Pollution nearby threatens public health now, and it also takes away the jobs and food that ordinary families need.

7. ENV-07 — Protecting places of natural beauty

With increasing populations and ever-growing urban centres, many countries are losing their natural beauty spots. What benefits are there to protecting places of natural beauty? How can this be solved?

Essay type	Double Question — List + List (benefits + solutions)
Position	No opinion is asked for. Natural places improve health and support tourism; national parks and better housing plans can save them.
Ideas from Idea Bank (Part 3)	Deforestation and Natural Places · Cities: Air Pollution, Traffic and Green Spaces · Air Travel, Tourism and the Environment
Structure	Double Question guide (List + List): Answer 1 + answer 2 → BP1 = Q1, List block (P E X P E L) → BP2 = Q2, List block (P E X P E L) → Both answers in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 35 · BP1 120 · BP2 105 · Conclusion 32 · **Total 292**

Introduction · 35 words

As populations and cities grow, many countries are losing their places of natural beauty. These places improve people's health and support tourism, and their loss can be prevented through national parks and smarter city planning.

Body Paragraph 1 · 120 words

Point One of the main benefits of protecting natural places is better health for people. Explain They provide **clean air and water**, protect biodiversity and offer people a place to relax and escape the stress of city life, which improves mental health. Example For example, a family from Dhaka who spends a weekend in the tea gardens of Sylhet can breathe clean air and return home much calmer, and this helps them cope with city stress. Point Another important benefit is that beautiful natural places attract visitors. Explain Tourists pay for hotels, guides, transport and food; as a result, places such as the beach at Cox's Bazar support thousands of local families. Link Consequently, these places are valuable for both people's well-being and the national economy.

Body Paragraph 2 · 105 words

Solution The most effective solution is for governments to turn important beauty spots into national parks. Explain Governments can **declare protected areas** and national parks where cutting trees and building are banned, and they must enforce these laws strictly. Example For instance, a hill forest that becomes a national park can no longer be cleared for housing, which keeps it safe for future generations. Solution In addition, city planners could find space for new homes without destroying nature. Explain Housing needs can often be met by building upwards or developing unused industrial land, rather than destroying parks. Link Together, these measures would allow cities to grow while their natural beauty survives.

Conclusion · 32 words

In conclusion, places of natural beauty keep people healthy and bring tourism income to local communities. National parks and careful planning of new housing would protect them as cities continue to expand.

8. ENV-08 — Parks or housing and business?

Although many people value their public parks, this space could be better used for other purposes such as residential areas for the ever-growing population or to develop business and boost the economy. To what extent do you agree or disagree with this?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Cities: Air Pollution, Traffic and Green Spaces · Economic Growth versus Environmental Protection
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	6 sentences (highlighted)
Word count	Intro 42 · BP1 120 · BP2 115 · Conclusion 35 · **Total 312**

Introduction · 42 words

It is sometimes claimed that city parks should be replaced with homes for the growing population or with businesses that support the economy. I completely disagree with this view because parks protect people's health and cities can find other land for development.

Body Paragraph 1 · 120 words

Point The main reason why I disagree with this idea is that parks are essential for people's physical and mental health. Explain This is

because parks give children a safe place to play and adults a place to exercise, relax and meet neighbours, which improves both physical and mental health. Explain Trees absorb pollution, provide shade and reduce temperatures in hot weather; as a result, people who live near green spaces can breathe cleaner air. Example For example, in a crowded city such as Dhaka, a family living beside a large park can breathe cleaner air and escape the summer heat, and losing it would leave them with only traffic fumes. Link Therefore, parks are not a luxury but a basic need for urban families.

Body Paragraph 2 · 115 words

Point Another important reason for my disagreement is that cities can find other land for housing and business. Explain When a city needs more homes, housing needs can often be met by building upwards or developing unused industrial land, rather than destroying parks. Example For instance, an old factory site can be turned into apartments while the nearby park remains open to everyone, which gives families both a home and a place to relax. Response Although some people argue that a growing population needs housing and businesses need space to grow, once a natural place is covered with concrete, it is almost impossible to restore it. Link Consequently, destroying parks is a permanent loss that growing cities can easily avoid.

Conclusion · 35 words

In conclusion, I firmly believe that public green spaces should not be sacrificed for apartments or commercial buildings. They keep city

residents healthy, and urban growth can take place on unused land without destroying them.

9. ENV-09 — Protecting endangered animals

With deforestation, urban development and illegal hunting, many animal species are becoming endangered as they lose their habitat and some are even threatened to the point of extinction. Do you think it is important to protect animals? What measures can be taken to deal with this problem?

Essay type	Double Question — Opinion + List (opinion + measures)
Position	Protecting animals is important; strict anti-poaching laws and community involvement would help.
Ideas from Idea Bank (Part 3)	Wildlife, Endangered Species and Biodiversity · Deforestation and Natural Places
Structure	Double Question guide (Opinion + List): Answer 1 + answer 2 → BP1 = Q1, Opinion block (P E X R L) → BP2 = Q2, List block (P E X P E L) → Both answers in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 33 · BP1 113 · BP2 98 · Conclusion 36 · **Total 280**

Introduction · 33 words

Deforestation, urban development and illegal hunting are pushing many animal species towards extinction. I firmly believe that protecting animals is important, and strict anti-poaching laws and community involvement would help to save them.

Body Paragraph 1 · 113 words

Point I firmly believe that protecting animals is important because every species helps to keep the natural system that humans depend on in balance. Explain Every species plays a role in its ecosystem; for instance, bees and other insects pollinate many of the crops we eat, and predators control the population of other animals. Example For example, if bees disappeared from an area, farmers would lose much of their fruit and vegetable harvest, which would raise food prices for everyone. Response Although some people argue that housing and farming should come first, people themselves suffer when wildlife disappears, because their food and water depend on healthy ecosystems. Link Therefore, protecting animals is also a way of protecting ourselves.

Body Paragraph 2 · 98 words

Solution One important measure is for governments to enforce **strict anti-poaching laws** in protected areas. Explain When trained forest guards patrol national parks and hunters receive heavy fines or prison sentences, killing rare animals becomes far too risky. Example For instance, a poacher who knows that rangers patrol the Sundarbans day and night is much less likely to hunt tigers there. Solution In addition, governments could employ local people as forest guards or tourist guides. Explain When communities earn money from living animals, they have a strong reason to protect them. Link Together, these measures would give endangered species a real chance of survival.

Conclusion · 36 words

In conclusion, I firmly believe that saving animals matters because ecosystems and human life depend on them. Tough laws against hunting and jobs that reward local people for protecting wildlife would help endangered species to survive.

10. ENV-10 — Global warming: causes and solutions

Global warming is one of the biggest threats to our environment. What causes global warming? What solutions are there to this problem?

Essay type	Cause and Solution
Position	Causes: burning fossil fuels and deforestation. Solutions: renewable energy incentives; protecting forests and planting trees.
Ideas from Idea Bank (Part 3)	Climate Change: Causes and Who Is Responsible · Renewable Energy and Fossil Fuels · Deforestation and Natural Places
Structure	Cause/Problem + Solution guide: 2 causes or problems + 2 solutions → BP1 (P E X P E L) → BP2, each solution fixing one point (N E X N E L) → Same ideas in new words
Reused from Idea Bank	6 sentences (highlighted)
Word count	Intro 34 · BP1 106 · BP2 114 · Conclusion 34 · **Total 288**

Introduction · 34 words

Global warming is among the most serious dangers facing the natural world today. It is mainly caused by burning fossil fuels and destroying forests, but renewable energy and forest protection can tackle this problem.

Body Paragraph 1 · 106 words

Point The main cause of global warming is the **burning of fossil fuels**. Explain When coal, oil and natural gas are burned in power stations, factories, cars and aeroplanes, they release carbon dioxide and other **greenhouse gases** into the atmosphere. Example For example, a power station that burns coal to supply a large city releases carbon dioxide every day, and this gas traps heat around the Earth like a blanket. Point Another important cause is deforestation, which is often carried out to create farmland. Explain Trees absorb carbon dioxide; when forests are cut down or burned, this natural protection is lost. Link Consequently, more heat is trapped around the planet every year.

Body Paragraph 2 · 114 words

Solution The most effective solution is for governments to replace fossil fuels with **renewable energy**. Explain When they offer **financial incentives**, such as subsidies or tax reductions, households and businesses can afford solar panels, so less coal and oil are burned. Example For instance, a Bangladeshi village family that installs solar panels with government help no longer depends on electricity from coal, which reduces its carbon emissions. Solution In addition, governments could protect the world's remaining forests. Explain They can **declare protected areas** and national parks where cutting trees and building are banned, and large-scale tree-planting programmes, especially with native species, can restore damaged land. Link Together, these measures would reduce greenhouse gases and slow the warming of the planet.

Conclusion · 34 words

In conclusion, global warming results mainly from the use of coal, oil and gas and the loss of trees. Clean power and stronger protection of woodland would significantly reduce this threat to the planet.

11. ENV-11 — Animals or poverty and healthcare?

Both governments and individuals are spending vast amounts of money protecting animals and their habitat. This money could be better spent dealing with fundamental issues in society such as poverty and health care. To what extent do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Wildlife, Endangered Species and Biodiversity · Economic Growth versus Environmental Protection
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 45 · BP1 101 · BP2 116 · Conclusion 36 · **Total 298**

Introduction · 45 words

It is often argued that the large sums spent on protecting animals and their homes should instead be used to tackle poverty and improve healthcare. I completely disagree with this view because conservation protects what humans need to survive and it can also reduce poverty.

Body Paragraph 1 · 101 words

Point The main reason why I disagree with this idea is that protecting animals and their habitats also protects what humans need to

survive. Explain This is because protecting forests and rivers also protects the clean water, food and climate that humans depend on. Explain Damaged forests and polluted rivers make people sick; as a result, healthcare costs rise and the poorest families suffer first. Example For example, a village that loses its forest and drinks from a polluted river may face constant illness, and this forces poor families to spend their small savings on medicine. Link Therefore, conservation supports human health as well as animals.

Body Paragraph 2 · 116 words

Point Another important reason for my disagreement is that conservation can actually reduce poverty. Explain When people earn a living from nature, they gain a strong reason to protect it, as national parks and wildlife reserves attract tourists, who pay for guides, hotels and food, creating jobs for local people. Example For instance, a family living near a reserve who open a small guesthouse may be able to send their children to school, which helps them to escape poverty. Response Although some people argue that poverty is more urgent, the money spent on conservation is usually a small part of national budgets. Link Consequently, moving this money elsewhere would hardly solve poverty, and it would destroy a useful source of income.

Conclusion · 36 words

In conclusion, I firmly believe that money for protecting wildlife and habitats should not be redirected to other social problems. Healthy nature keeps human communities alive, and it also offers poor families useful work and income.

12. ENV-12 — Improving the urban environment

As a result of growth in some urban centres, the environment in those cities is deteriorating. How could this issue be tackled by both the government and individuals?

Essay type	Solutions by two groups (Cause/Problem + Solution guide, Section 14)
Position	No opinion is asked for. Governments should improve public transport and control pollution; individuals should change their daily habits.
Ideas from Idea Bank (Part 3)	Cities: Air Pollution, Traffic and Green Spaces · Environmental Education and Individual Action
Structure	Cause/Problem + Solution guide, Section 14: both answers in one sentence → BP1 the first group's solution (N E E X L) → BP2 the second group's solution (N E E X L) → Same ideas in new words, no opinion
Reused from Idea Bank	3 sentences (highlighted)
Word count	Intro 36 · BP1 97 · BP2 97 · Conclusion 33 · **Total 263**

Introduction · 36 words

As many cities grow rapidly, their air, water and streets are becoming dirtier and more crowded. Governments can tackle this by improving public transport and controlling pollution, while individuals can help by changing their daily habits.

Body Paragraph 1 · 97 words

Solution The most effective solution is for governments to reduce traffic and pollution in growing cities. Explain Governments can **invest in public transport**, such as metro rail systems and reliable bus networks, so that people do not need private cars. Explain Strict rules on vehicle emissions and factory pollution, together with fines for those who break them, can reduce dirty air. Example For example, a factory owner who must pay a heavy fine for releasing black smoke will soon install filters, which makes the air in nearby neighbourhoods much cleaner. Link Consequently, government action can tackle the biggest sources of urban pollution.

Body Paragraph 2 · 97 words

Solution In addition, individuals could change their daily habits to protect their city. Explain Individuals can contribute too, by using public transport, sharing cars, keeping their vehicles well maintained and taking part in tree-planting or clean-up activities. Explain Separating household waste, avoiding plastic bags and saving electricity at home also reduce the pressure on overloaded city services. Example For instance, a family that stops using plastic bags and separates its waste can help to keep local drains clear, which reduces flooding in the rainy season. Link Together, these measures would make crowded cities much cleaner and healthier places for everyone to live.

Conclusion · 33 words

In conclusion, the declining environment of growing cities can be improved if governments invest in transport and enforce pollution

laws. Responsible habits among residents, such as reducing waste, would add to this progress.

13. ENV-13 — Governments or individuals?

Some people think that current environmental issues are global problems and should therefore be dealt with by the government while others believe that these problems can only be tackled by individuals. Discuss both sides and give your opinion.

Essay type	Discussion (both views + opinion)
Position	Governments should deal with environmental problems.
Ideas from Idea Bank (Part 3)	Climate Change: Causes and Who Is Responsible · Environmental Education and Individual Action
Structure	Discuss Both Views guide: Both views + clean opinion → BP1 the other view (P E E X L) → BP2 my view (P E X R L) → Both themes + opinion in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 38 · BP1 98 · BP2 112 · Conclusion 43 · **Total 291**

Introduction · 38 words

While some people believe that environmental damage can only be reduced by ordinary citizens, others argue that such worldwide problems are the responsibility of governments. I completely support the latter view because only governments have the necessary power.

Body Paragraph 1 · 98 words

Point On the one hand, people who support individual action argue that every person contributes to the problem through the energy they

use and the products they buy. Explain Individual actions may seem small, but they **add up** when millions of people take part. Explain By using public transport and avoiding single-use plastic, ordinary families can reduce pressure on the environment. Example For example, a family in Dhaka that travels by bus and carries cloth bags produces less waste, and this change costs them very little. Link For this reason, many people believe that protecting the environment must begin with the ordinary citizen.

Body Paragraph 2 · 112 words

Point On the other hand, I firmly believe that governments should deal with these problems because they alone have the power to act on a large scale. Explain When pollution comes mainly from power stations and factories, strict laws and large investments in clean energy are required, and a single person cannot provide them. Example For instance, a factory owner who pollutes a river may ignore residents' complaints, but a law with heavy fines can force every factory to clean up its waste. Response Although some people argue that small actions add up, people can only make green choices if those choices are available and affordable. Link Consequently, individual effort cannot succeed unless governments **take the lead**.

Conclusion · 43 words

In conclusion, people hold different views on whether citizens or national leaders should tackle environmental damage. While individual choices can reduce waste and pollution, I firmly believe

that governments should solve these problems because only they can make changes on the required scale.

14. ENV-14 — Rich nations or poorer nations?

Global environmental issues are the responsibility of rich nations not of poorer nations. Do you agree with this opinion?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Global Problems and International Cooperation · Economic Growth versus Environmental Protection
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 45 · BP1 111 · BP2 120 · Conclusion 38 · **Total 314**

Introduction · 45 words

It is sometimes claimed that solving the world's environmental problems is the duty of wealthy countries and not of poorer ones. I completely disagree with this view because developing countries are now major polluters and they also have the power to solve their own problems.

Body Paragraph 1 · 111 words

Point The main reason why I disagree with this idea is that developing countries are now major sources of pollution. Explain This is because some developing countries are now among the fastest-growing

sources of emissions as they industrialise. Explain If only some countries reduce their emissions while others continue to pollute heavily, the overall problem will not be solved; as a result, every nation must take part. Example For example, a new coal power station in a poor country releases the same gases as one in a rich country, and these gases warm the whole planet in exactly the same way. Link Therefore, global problems cannot be solved if poorer nations are excused from the effort.

Body Paragraph 2 · 120 words

Point Another important reason for my disagreement is that poorer nations have the power to solve many of their own problems. Explain When environmental damage happens inside a country, its government can act, because deforestation, river pollution and waste problems also occur in poorer countries, and their own governments have the power to address them. Example For instance, a government in a developing country can stop factories from releasing untreated waste into rivers, which protects its own people. Response Although some people argue that rich countries have produced the largest share of greenhouse gases over the past two centuries, this history does not remove the duty of other countries to act today. Link Consequently, poorer nations should act now instead of waiting for rich countries.

Conclusion · 38 words

In conclusion, I firmly believe that protecting the planet is a duty for every country, whatever its wealth. Poorer nations now add greatly to

global pollution, and their leaders are also able to deal with damage at home.

15. ENV-15 — International or domestic action?

Many people believe that global environmental problems should be dealt with internationally rather than domestically. What is your opinion?

Essay type	Agree / Disagree
Position	I completely agree.
Ideas from Idea Bank (Part 3)	Global Problems and International Cooperation · Cities: Air Pollution, Traffic and Green Spaces
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	2 sentences (highlighted)
Word count	Intro 42 · BP1 113 · BP2 111 · Conclusion 36 · **Total 302**

Introduction · 42 words

It is often argued that the world's environmental problems should be solved through cooperation between countries rather than by each country alone. I completely agree with this view because these problems cross national borders and countries are more willing to act together.

Body Paragraph 1 · 113 words

Point The main reason why I agree with this idea is that environmental problems cross national borders. Explain This is

because greenhouse gases released in one country warm the whole planet, air pollution can travel to neighbouring countries, and plastic dumped in one river can end up on beaches thousands of kilometres away. Explain No single government can control what happens beyond its own borders; as a result, domestic action alone cannot protect its citizens. Example For example, a shared river can only be protected if all neighbouring countries control pollution, and one careless factory upstream can harm millions of people downstream. Link Therefore, problems that belong to the whole world need solutions that involve the whole world.

Body Paragraph 2 · 111 words

Point Another important reason for my agreement is that countries are more willing to act together. Explain When a government acts alone, it may hesitate, because countries may also worry that strict environmental rules will make their industries less competitive, so they are more willing to act if they know that others are doing the same. Example For instance, a country may accept a limit on factory emissions when its trading partners accept the same limit, which protects its businesses. Response Although some people argue that national governments understand local conditions better, global warming and ocean plastic are far too large for them. Link Consequently, international agreements offer the strongest way to deal with these threats.

Conclusion · 36 words

In conclusion, I firmly believe that worldwide environmental threats should be tackled jointly by nations instead of separately. Pollution

pays no attention to borders, and shared agreements also give governments the confidence to introduce stronger rules.

16. ENV-16 — Hunting animals for decoration and medicine

Many animals are being hunted to the brink of extinction in order to fulfil the demand and greed of mankind for decorative purposes as well as for other reasons, such as traditional medicine. How can this issue be tackled?

Essay type	Solutions only (Cause/Problem + Solution guide, Section 14)
Position	No opinion is asked for. Governments should enforce strict laws against poaching, and campaigns should reduce the demand for animal products.
Ideas from Idea Bank (Part 3)	Wildlife, Endangered Species and Biodiversity · Global Problems and International Cooperation
Structure	Cause/Problem + Solution guide, Section 14: both answers in one sentence → BP1 Solution 1 (N E E X L) → BP2 Solution 2 (N E E X L) → Same ideas in new words, no opinion
Reused from Idea Bank	1 sentence (highlighted)
Word count	Intro 36 · BP1 97 · BP2 96 · Conclusion 35 · **Total 264**

Introduction · 36 words

Many animals are being hunted almost to extinction to supply decorative items and traditional medicines. Governments can tackle

this by enforcing strict laws against poaching, and campaigners can help by reducing the demand for animal products.

Body Paragraph 1 · 97 words

Solution The most effective solution is for governments to make poaching and smuggling far more difficult. Explain Because these products can be sold for high prices, criminal groups are willing to take great risks. Explain Strong border controls, heavy prison sentences for traffickers and well-trained forest guards with modern equipment can make those risks much greater than the profits. Example For example, a smuggler who knows that customs officers check every container for ivory is far less likely to try to move it across the border. Link Consequently, strict enforcement can cut the supply of these products before they reach the market.

Body Paragraph 2 · 96 words

Solution In addition, awareness campaigns could reduce the demand for animal products. Explain Public campaigns, supported by well-known celebrities, can show consumers that buying ivory, horns or animal skins directly causes the death of endangered animals. Explain Doctors and traditional healers can also promote alternative medicines that do not use animal parts, so buyers have a safe choice. Example For instance, a man who learns that a rhino was killed to make his medicine may choose a herbal remedy instead, which removes one more buyer from the market. Link Together, these measures would make hunting endangered animals both dangerous and unprofitable.

Conclusion · 35 words

In conclusion, the hunting of rare animals for decoration and medicine can be reduced if governments enforce tough laws. Education that lowers the demand for animal products would also remove the profit that drives poaching.

17. ENV-17 — Is restricting air travel the only way?

Restricting air travel is the only way to prevent air pollution. Do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Air Travel, Tourism and the Environment · Cities: Air Pollution, Traffic and Green Spaces · Renewable Energy and Fossil Fuels
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 38 · BP1 109 · BP2 107 · Conclusion 38 · **Total 292**

Introduction · 38 words

It is sometimes claimed that limiting the number of flights is the only solution to air pollution. I completely disagree with this view because most dirty air comes from other sources and many other solutions are more effective.

Body Paragraph 1 · 109 words

Point The main reason why I disagree with this idea is that most air pollution comes from sources other than aeroplanes. Explain This is because it comes from vehicle exhaust, factories, construction dust,

brick kilns and the burning of waste, which affect cities every day. Explain These sources are located close to where people live and work; as a result, they cause far more harm to public health than planes flying high above. Example For example, brick kilns on the outskirts of many cities produce thick smoke during the dry season, and this smoke is breathed by thousands of local families. Link Therefore, restricting flights would leave the main causes of dirty air untouched.

Body Paragraph 2 · 107 words

Point Another important reason for my disagreement is that many other solutions are more effective. Explain When governments want cleaner air, they can use strict rules on vehicle emissions and factory pollution, together with fines for those who break them, and they can replace coal power stations with **renewable energy**. Example For instance, a city that fines factories for releasing black smoke can reduce air pollution within months, which protects local families every single day. Response Although some people argue that aeroplanes burn large amounts of fuel, restricting travel completely would be neither realistic nor fair. Link Consequently, it is clearly wrong to describe limits on air travel as the only answer.

Conclusion · 38 words

In conclusion, I firmly believe that reducing air travel is not the only way to stop air pollution. Vehicles and factories create far more everyday pollution, and stronger laws and cleaner transport can clean the air more effectively.

18. TOU-09 — Regular international flights

Many people around the world now take regular international flights. Do the advantages of this trend outweigh the disadvantages to the environment?

Essay type	Advantages vs Disadvantages — Type 2 (outweigh)
Position	The advantages clearly outweigh the disadvantages to the environment.
Ideas from Idea Bank (Part 3)	Air Travel, Tourism and the Environment · Climate Change: Causes and Who Is Responsible
Structure	Adv/Disadv guide: Although-intro → BP1 advantages (7 sentences) → BP2 disadvantages (7 sentences) → While-conclusion
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 43 · BP1 128 · BP2 123 · Conclusion 42 · **Total 336**

Introduction · 43 words

Many people around the world now take international flights for work and holidays. Although frequent flying adds to climate change and damages popular natural sites, it supports millions of jobs and keeps families connected. In my opinion, the advantages clearly outweigh the disadvantages.

Body Paragraph 1 · 128 words

Topic There is little doubt that regular international flights offer considerable advantages to people and economies. Point To begin with, the greatest benefit is that air travel supports tourism and international trade. Explain This is because tourism **generates income and employment** for millions of people, including hotel staff, guides, drivers and craftspeople. Example For example, a tour guide in Nepal who shows foreign visitors around the mountains can earn enough to send his children to a good school. Point In addition, flights not only bring cultures together but also connect families separated by migration. Explain As a result of cheaper air travel, a Bangladeshi worker in the Middle East can visit his family every year, which keeps their bonds strong. Summary Overall, regular flights support jobs, family life and understanding between people from different nations.

Body Paragraph 2 · 123 words

Topic On the other hand, it cannot be denied that frequent flying also has some drawbacks. Point Firstly, the most serious problem is the large amount of carbon that aeroplanes produce. Explain Aeroplanes burn large amounts of fuel; as a result, frequent flying adds significantly to climate change. Example For instance, a single long-distance return flight can produce as much carbon per passenger as several months of driving, which shows how quickly the damage adds up. Point Secondly, mass tourism can damage the very natural places that travellers come to see and enjoy. Explain If popular beaches, mountains and islands are crowded with hotels and roads, habitats

are destroyed and, consequently, wildlife disappears. Summary Although these problems are serious, cleaner aircraft fuels and responsible travel choices can greatly reduce them.

Conclusion · 42 words

In conclusion, international air travel has become a normal part of modern life. While it increases carbon emissions and puts pressure on fragile natural sites, it creates jobs and keeps people connected across borders. Therefore, I believe the benefits outweigh the drawbacks.

19. TOU-10 — Raising the cost of international flights

Raising the cost of international flights is the best way to reduce air pollution. Do you agree?

Essay type	Agree / Disagree
Position	I completely disagree.
Ideas from Idea Bank (Part 3)	Air Travel, Tourism and the Environment · Cities: Air Pollution, Traffic and Green Spaces
Structure	Agree/Disagree guide: Opinion + 2 ideas → BP1 Idea 1 (P E E X L) → BP2 Idea 2 (P E X R L) → Opinion + 2 ideas in new words
Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 43 · BP1 113 · BP2 119 · Conclusion 43 · **Total 318**

Introduction · 43 words

It is sometimes claimed that making overseas flights more expensive is the most effective way to cut air pollution. I completely disagree with this view because higher prices are unfair to ordinary families and flights are not the main cause of air pollution.

Body Paragraph 1 · 113 words

Point The main reason why I disagree with this idea is that higher flight prices are unfair to ordinary families. Explain This is because this would make travel a privilege for the rich and would hurt families who need to visit relatives abroad. Explain Wealthy passengers can

easily pay an extra charge; as a result, they would keep flying while poorer passengers stay at home. Example For example, a Bangladeshi worker in the Middle East who saves for a whole year to visit their family may no longer be able to afford the ticket, and this would keep parents and children apart. Link Therefore, this policy would punish people who fly out of need and not for pleasure.

Body Paragraph 2 · 119 words

Point Another important reason for my disagreement is that flights are not the main source of air pollution in most countries. Explain When people breathe dirty air in cities, the real causes are on the ground, because it comes from vehicle exhaust, factories, construction dust, brick kilns and the burning of waste. Example For instance, a family living beside a busy road in Dhaka breathes traffic fumes all day, which a more expensive ticket would not change. Response Although some people argue that higher prices could reduce unnecessary flights and raise money for clean energy, strict rules on vehicle emissions and factory pollution would clean the air much faster. Link Consequently, raising ticket prices cannot be the best way to deal with this problem.

Conclusion · 43 words

In conclusion, I firmly believe that increasing the cost of overseas air travel is not the most effective way to reduce pollution. It places an unfair burden on ordinary travellers, and it also ignores the traffic and factories that cause most dirty air.

20. HOU-02 — Trees or housing on vacant city land?

Planting trees is very important for the environment. Some people say trees should be planted in the vacant areas of cities and towns, while others say housing should be built instead. Do you agree or disagree?

Essay type	Discussion (both views + opinion)
Position	Vacant city land should be used for planting trees.
Ideas from Idea Bank (Part 3)	Cities: Air Pollution, Traffic and Green Spaces · Deforestation and Natural Places

Reused from Idea Bank	4 sentences (highlighted)
Word count	Intro 40 · BP1 92 · BP2 111 · Conclusion 39 · **Total 282**

Introduction · 40 words

While some people argue that empty land in cities should be used for housing, others believe that trees should be planted there. I completely support the latter view because green spaces make cities healthier for everyone who lives in them.

Body Paragraph 1 · 92 words

Point On the one hand, people who support building homes argue that a growing population needs housing and businesses need space to grow. Explain Rising rents push many low-income families into

crowded slums with poor sanitation. Explain New flats can be built on empty land quite quickly; as a result, more families can afford a safe home. Example For example, an apartment block on a vacant plot in Dhaka could house hundreds of families, and this would reduce pressure on nearby slums. Link For this reason, many people believe that vacant land should be used for housing.

Body Paragraph 2 · 111 words

Point On the other hand, I firmly believe that trees should be planted on this land because trees absorb pollution, provide shade and reduce temperatures in hot weather. Explain When a crowded area has a park, residents enjoy cleaner air, and they also have a place to exercise, relax and meet neighbours. Example For instance, a small green area in a crowded part of Dhaka can provide cool shade for thousands of residents, which makes hot summer months easier to bear. Response Although some people argue that families urgently need homes, housing needs can often be met by building upwards or developing unused industrial land. Link Consequently, vacant land in cities should be kept for trees.

Conclusion · 39 words

In conclusion, people hold different views on whether vacant urban land should be used for trees or for housing. While growing cities need more homes, I firmly believe that trees should come first because green areas protect people's health.
