IELTS Writing Task 2 — Topic Idea Bank

Chapter 05 · Government & Public Spending

Ideas · Vocabulary · Sentence Structure · Bangla Translation
Essays · Homework

How to Use This Chapter

এই অধ্যায়টি কীভাবে পড়বে (8-day plan)

1. **Day 1:** Part 1 ও Part 2 মন দিয়ে পড়ো। Idea flow chain ও "N-L-F test" কৌশলটি মুখস্থ করো। তারপর Part 3-এর প্রথম 3টি category পড়ো।
2. **Day 2:** Part 3-এর আরও 4–5টি category পড়ো। **Bold** করা collocation-গুলো খাতায় লিখে রাখো। Part 4 থেকে 15টি শব্দ শেখো।
3. **Day 3:** Part 3-এর বাকি category ও Part 4-এর বাকি শব্দ শেষ করো। Part 5 থেকে 5টি sentence pattern নিজের উদাহরণ দিয়ে লেখো।
4. **Day 4–6:** প্রতিদিন Part 6-এর একটি বাংলা essay ইংরেজিতে অনুবাদ করো (40 মিনিট)। প্রতিটি অনুচ্ছেদের word target মেনে চলো। শেষে Part 8 checklist দিয়ে মিলিয়ে নাও।
5. **Day 7–8:** Part 9-এর homework essay নিজে নিজে লেখো, কোনো সাহায্য ছাড়া, ঘড়ি ধরে 40 মিনিটে।
6. যেকোনো একটি লেখা AI-কে পাঠিয়ে feedback নাও, তারপর ভুলগুলো "error notebook"-এ লিখে রাখো।

তোমার word plan — essay-র ধরন অনুযায়ী (Part 2G দেখো): Agree / Disagree **270–345** · Discuss Both Views **260–299** · Advantages – Disadvantages **330–360** (মতামত না চাইলে 310–340) · Cause/Problem + Solution ও Double Question **260–300** → সহজ হিসাব: 35 + 105 + 105 + 35 = **280 words**

Parts in this chapter

Part	Content
1	Idea Generation Flow
2	Exam-Hall Brainstorming System
3	Category-Wise Free Writing (12 categories)
4	Vocabulary & Collocation Bank
5	Sentence Structure Toolkit
6	Bangla → English Translation Essays (3 essays)
7	Question Bank
8	Self-Check Checklist
9	Homework Essays (4 essays)

Part 1 — Idea Generation Flow

Government → Role of Government (Laws, Lifestyle & Freedom) → Education vs Defence → Public Transport vs Roads → Arts vs Science Funding → Healthcare & Public Services → Space Exploration → Sports Facilities & Big Events → Welfare & Poverty → Foreign Aid → Taxation → Rural Development → Museums & Heritage

When you see **any** government or public-spending question, run through this chain from left to right and ask: *"Does this question touch this area?"* Then **stop at the 2 links that fit the question best**. Those 2 links become your two body paragraphs.

Memory trick — almost every spending question is a choice between A and B. Judge it with the N-L-F test:

Test	Question to ask yourself	Example (space vs poverty)
N — Need	How many people benefit, and how urgent is the need?	poverty affects millions now; space is less urgent
L — Long-term return	What benefits will this bring in 10–20 years?	satellites, weather warnings, new technology
F — Fairness	Who pays, who benefits, is anyone left behind?	taxpayers pay; poor countries may not benefit

Use N for one body paragraph and L or F for the other. In the conclusion, a "balanced budget" answer (fund both, but set clear priorities) is usually the safest and most mature position.

Example: *"Governments should spend money on public transport rather than building new roads."*

N → public transport serves more people (students, workers, the poor) ✓ — L → less pollution and traffic in the future ✓ — F → poor people without cars benefit ✓. Chain links: **Public Transport vs Roads** + **Rural Development** (roads still needed in villages).

Part 2 — Exam-Hall Brainstorming System

2A. The 5-Minute Plan

Minute	What to do	What you write on the question paper
0–1	**Decode the question.** Underline the topic words and the instruction words. Find A and B (what is being compared).	e.g. *arts / wasting money / elsewhere → Agree / Disagree guide; A = arts, B = other services*
1–3	**N-L-F grid** for A and for B.	4–6 one-line notes
3–4	**Choose the 2 strongest ideas.** Add one reason and one example to each.	Idea 1 + why + example; Idea 2 + why + example
4–5	**Decide your position (one clear side, only if the question asks) and use the guide's word plan.**	Thesis / BP1 / BP2 / Conclusion in 4 lines

> **পরীক্ষার হলে মনে রাখো:** "Government should spend more on A **than** B" ধরনের প্রশ্নে কখনো লিখবে না যে B সম্পূর্ণ বাদ দেওয়া উচিত। পরীক্ষক পরিণত (balanced) চিন্তা পছন্দ করেন। সবচেয়ে ভালো অবস্থান: **"A-কে অগ্রাধিকার দেওয়া উচিত, তবে B-তেও যুক্তিসংগত বাজেট রাখতে হবে।"**

2B. WHO is affected?

- **Taxpayers** — they pay for every public service and want value for money

- **Poor and vulnerable people** — depend most on free schools, hospitals, welfare and public transport
- **Students and young people** — education budget, sports facilities, job opportunities
- **Patients and elderly people** — healthcare spending, pensions, care
- **Artists, musicians and performers** — arts funding, museums, festivals
- **Scientists and researchers** — science and space budgets
- **Rural communities** — roads, electricity, internet, schools, clinics
- **Businesses** — infrastructure, taxes, a skilled workforce
- **The armed forces and citizens' safety** — defence budget
- **Future generations** — long-term investments, debt, heritage

2C. WHAT is the effect?

Type of effect	Government spending example
Economic	Roads and railways help businesses grow; tourism from museums brings income.
Social	Welfare reduces poverty and crime; public transport helps poor workers reach jobs.
Educational	More funding for schools means better teachers, smaller classes, more skills.
Health	Public hospitals and vaccinations protect the whole population.
Cultural	Arts and heritage funding protect national identity.
Security	Defence spending protects borders; but too much takes money from schools.

Type of effect	Government spending example
Equality / fairness	Rural development and free services narrow the gap between rich and poor.
Future / long-term	Science and education investments pay off for decades.

2D. Quick Idea Bank (one row per category)

Category	Arguments FOR spending	Arguments AGAINST / limits	Ready example
Role of government	• laws protect public safety and health • only government can act on a large scale	• limits personal freedom • individuals can also change society	seat-belt and smoking laws that saved many lives
Education vs defence	• education = skilled workforce, long-term growth • defence = safety, sovereignty	• weak defence = insecurity • huge military budgets waste money	a country that spends more on weapons than on schools

Category	Arguments FOR spending	Arguments AGAINST / limits	Ready example
Public transport vs roads	• moves many people, cuts pollution • helps the poor	• very expensive, takes years to build • roads still needed for goods and villages	the Dhaka metro rail reducing journey times
Arts vs science	• arts = culture, tourism, well-being • science = health, technology, jobs	• arts seem less urgent • science can be funded by companies	a national theatre that attracts tourists
Healthcare & public services	• health is a basic right • healthy workers = productive economy	• costs rise every year • waste and corruption	free vaccination for every child
Space exploration	• satellites, weather warnings, new technology	• enormous cost; poverty on Earth	cyclone warnings from weather satellites

Category	Arguments FOR spending	Arguments AGAINST / limits	Ready example
Sports & big events	• international image, tourism, facilities • inspires young people to exercise	• huge cost, stadiums unused later • debt and displacement	a country left with empty stadiums after hosting a tournament
Welfare & poverty	• safety net, reduces crime and hunger	• may reduce motivation to work • costly	unemployment benefits while a worker retrains
Foreign aid	• saves lives in disasters • builds roads, schools, clinics	• corruption, dependence • money needed at home	a donor-funded bridge connecting villages to markets
Taxation	• pays for public services • progressive tax reduces inequality	• high taxes may discourage investment • tax evasion	the rich paying a higher rate to fund free schools
Rural development	• reduces migration to cities • electricity, internet, roads	• fewer people → less "value" • hard to reach	solar power and internet in a remote village school

Category	Arguments FOR spending	Arguments AGAINST / limits	Ready example
Museums & heritage	• history and identity • tourism, education	• maintenance costs • few visitors in some places	a museum where schoolchildren learn about the Liberation War

2E. How One Idea Becomes a Full Paragraph (PEEL)

Point → **E**xplain (why? how?) → **E**xample → **L**ink / Result

> **বাংলায় চিন্তা (Bangla thinking)**
>
> **Point:** শিক্ষায় বিনিয়োগ একটি দেশের দীর্ঘমেয়াদি উন্নয়নের ভিত্তি। **Explain:** কারণ শিক্ষিত ও দক্ষ জনশক্তি বেশি উৎপাদনশীল হয় এবং নতুন শিল্প আকর্ষণ করে। **Example:** যেমন, যে দেশ প্রকৌশল ও প্রযুক্তি শিক্ষায় বিনিয়োগ করে, সেখানে বিদেশি প্রতিষ্ঠানগুলো কারখানা ও অফিস খুলতে আগ্রহী হয়। **Link/Result:** ফলে নতুন চাকরি তৈরি হয় এবং দেশের অর্থনীতি শক্তিশালী হয়।

The same idea in English (one paragraph):

> **Point:** Investment in education is the foundation of a country's long-term development. **Explain:** This is because an educated and skilled workforce is more productive and attracts new industries. **Example:** For example, when a country invests in engineering and technology education, foreign companies become more interested in opening factories and offices there.

Link: As a result, new jobs are created and the national economy becomes stronger.

Count it: about **60 words** from one idea. Add a second explanation (for example, educated citizens are healthier and less likely to commit crime) and you reach the **100–120 words** that one body paragraph needs.

2F. Worked Brainstorm Demo

> *More developing countries are given aid from international organisations to help them in their development plans. Some people argue that financial aid is important, but others suggest that practical aid and advice are more important. Discuss both views and give your opinion.*

Source: IELTS Liz · SOC-04 (also in the Part 7 Question Bank)

My 5-minute notes:

```
Type: Discussion (both views + opinion) → Discuss Both Views guide
Other view (BP1) = financial aid    My view (BP2) = practical aid &
advice
N-L-F:  A → Need: fast help in disasters, big projects (bridges,
hospitals)
        B → Long-term: skills stay in the country ✓ (my reason)
        F → money can be stolen; training reaches local people
directly

Intro (35–45w): While some people argue that money is the most useful
aid,
                others believe that practical help and advice matter
more.
                I completely support the latter view because skills
last longer.
BP1 (90–120w) OTHER VIEW, no "I" – P E E X L:
   money funds large projects and emergencies quickly
   ex: money after a cyclone rebuilds bridges and hospitals
   L: For this reason, many people believe that financial aid matters
most
BP2 (90–120w) MY VIEW – P E X R L:
   practical aid builds skills that remain after the aid ends
   ex: foreign experts train local engineers to maintain a water
system
   R: Although some argue large projects need money first, money may
be
      stolen by officials, while skills cannot be stolen
   L: Consequently, practical aid is more important
Conclusion (35–45w): In conclusion, people hold different views on
whether …
                     While …, I firmly believe that … because …
```

কেন এই পরিকল্পনা? বিপরীত মত (অর্থ সাহায্য) সবসময় আগে, নিজের মত (ব্যবহারিক সাহায্য) শেষে, তাই "the latter view" সবসময় তোমার পক্ষকেই বোঝায়। "combination" বা "money is still needed" ধরনের আংশিক উপসংহার লিখবে না। N-L-F test-এর **Long-term** যুক্তিটি

> তোমার মতকে সবচেয়ে শক্ত করে। Idea chain-এর **Foreign Aid** ও **Rural Development** থেকে idea নেওয়া হয়েছে।

2G. Essay-Type Paragraph Plans (your five essay guides)

Essay type (guide)	Introduction	Body Paragraph 1	Body Paragraph 2	Conclusion
Agree / Disagree (*to what extent? / do you agree?*)	**35–50:** paraphrase + *I completely agree/disagree with this view because* Idea 1 and Idea 2. Never "partly".	**100–120:** Idea 1 — P E E X L	**100–120:** Idea 2 — P E X R L (*Although some people argue that …, [my side]*)	**35–55:** *In conclusion, I firmly believe that …* + both ideas in new words
Discuss Both Views (*some think X, others think Y*)	**35–45:** *While some people argue that [other view], others believe that [my view]. I completely support the latter view because …*	**90–120:** the view you do **not** support, no "I" — P E E X L	**90–120:** **your view** — P E X R L	**35–45:** *In conclusion, people hold different views on whether … While …, I firmly believe that …*

Essay type (guide)	Introduction	Body Paragraph 1	Body Paragraph 2	Conclusion
Advantages – Disadvantages	**40–50:** paraphrase + *Although* [side you do not support], [side you support] + opinion only if asked (no opinion asked: **30–40**, 2 sentences)	**120–135:** advantages — 7 sentences (T P E X P E S)	**120–135:** disadvantages — 7 sentences (T P E X P E S)	**35–45:** *While* … + opinion only if asked (no opinion asked: **25–35**)
Cause/Problem + Solution	**30–40:** paraphrase + *This is mainly because C1 and C2, but S1 and S2 can tackle this problem.* No opinion.	**90–120:** 2 causes or problems — P E X P E L	**90–120:** 2 solutions, each fixing one cause (WHO + WHAT + HOW)	**30–40:** causes + solutions in new words
Double Question (*two questions*)	**30–40:** paraphrase + *[Answer 1], and [answer 2].*	**90–120:** answer to Q1 — List block (P E X P E L) or Opinion block (P E X R L)	**90–120:** answer to Q2 — List or Opinion block	**30–40:** *In conclusion,* answer 1 + answer 2 in new words

Full rules: `Writing/IELTS_*_Essay_Guide.md`. Questions asking only for solutions or only for problems use the Cause/Problem + Solution guide, Section 14: one idea in each body paragraph (P E E X L), no opinion.

শব্দ ও বাক্যের পরিকল্পনা — তোমার পাঁচটি guide

- **শব্দসংখ্যা:** Agree / Disagree 270–345 · Discuss Both Views 260–299 · Advantages – Disadvantages 330–360 (মতামত না চাইলে 310–340) · Cause/Problem + Solution ও Double Question 260–300। সহজ হিসাব: 35 + 105 + 105 + 35 = 280।
- **Introduction ও Conclusion:** সবসময় 2টি বাক্য (Advantages – Disadvantages-এ মতামত চাইলে 3টি)। "This essay will..." ধরনের বাক্য কখনো লিখবে না।
- **Body paragraph:** প্রতিটি বাক্য গড়ে 18–22 শব্দ। Example সবসময় ঠিক আগের Explain বাক্যটিকেই দেখায়।
- **সতর্কতা:** Body paragraph 90 শব্দের কম হলে বুঝবে ব্যাখ্যা বা উদাহরণ যথেষ্ট নয়। আরেকটি "কেন?" বা "ফলে কী হয়?" বাক্য যোগ করো।
- **Government essay-তে টিপস:** Agree / Disagree essay-তে বিপরীত মতকে মেনে নিয়ে জবাব দাও শুধু BP2-এর Response বাক্যে: *Although some people argue that ..., [তোমার পক্ষ]*। তোমার পক্ষ সবসময় comma-র পরে থাকবে, তাই essay পরিণত দেখায় কিন্তু উত্তর আংশিক হয় না।

Part 3 — Category-Wise Free Writing

Each passage below is an **idea store**. Read it slowly, notice how each idea is explained and supported with an example, and pay attention to the **bold collocations**. After each passage, try to say 4–5 of its ideas aloud in your own words.

The Role of Government: Laws, Lifestyle and Individual Freedom

One of the oldest debates in politics is how much power a government should have over people's lives. Some believe that governments should make decisions about citizens' lifestyles, such as what they eat, whether they smoke or how they drive, in order to protect public health and safety. Others argue that adults should be free to make their own choices, even if those choices are not always wise. Closely related is the question of whether real change in society comes mainly from governments or from individuals.

There are strong arguments for government action. Some problems are too large for individuals to solve alone. Only governments can **pass laws**, collect taxes and build national systems such as hospitals, schools, roads and electricity networks. Laws can also protect people from harm. Seat-belt laws, speed limits, bans on smoking in public places and food safety rules have saved many lives. In these cases, a small limit on personal freedom brings a large benefit to society. Moreover, unhealthy choices by individuals can affect others; for example, smoking harms people nearby, and treating lifestyle-related illnesses is expensive for public healthcare systems.

Governments are also responsible for protecting the weak. Children cannot make fully informed decisions, so governments set rules about school attendance, child labour and advertising to children. Similarly, laws protect workers, consumers and minorities from unfair treatment.

However, too much government control can be harmful. Adults should have the **right to make their own decisions** about their private lives, as long as they do not harm others. If governments decide what people eat, wear or do in their free time, citizens may feel that their freedom is being taken away, and they may lose trust in their leaders. In some countries, governments have used "public interest" as an excuse to control people's lives and silence criticism.

Individuals can also have a powerful influence on society. History shows that many important changes began with ordinary people: campaigns for civil rights, women's right to vote, environmental protection and independence movements all started with individuals who refused to accept injustice. Today, social media allows a single person to **raise awareness** of a problem and mobilise thousands of supporters. Entrepreneurs, teachers, doctors and volunteers also change society through their daily work.

In practice, the most effective changes happen when governments and individuals work together. Governments can create laws and provide resources, but laws work best when citizens understand and support them. For example, recycling laws are only effective if people actually separate their waste. Similarly, public campaigns often begin with citizens and later become government policy.

In conclusion, governments have an important duty to protect public health and safety, and some lifestyle rules are justified. However, they should respect individual freedom and avoid unnecessary control.

Meaningful social change usually depends on **cooperation between governments and citizens**, each playing their own part.

Education versus Defence

Every government must divide its limited budget between many needs. Two of the largest areas of spending in many countries are education and defence. Some people believe that governments should spend more on education than on the military, while others argue that a strong defence is essential to protect a nation and its citizens. This debate reflects a deeper question about what makes a country truly secure and successful.

Supporters of greater education spending argue that education is the **foundation of long-term development**. A well-educated population is more productive, more innovative and better able to compete in the global economy. Educated citizens tend to earn higher incomes, pay more taxes, live healthier lives and are less likely to commit crimes. Investment in schools and universities also reduces poverty and inequality, because it gives children from poor families the chance to improve their lives. From this point of view, money spent on education **pays for itself** many times over.

In addition, education can contribute to peace and security in its own way. When young people have good schools and job opportunities, they are less likely to be drawn into crime, violence or extremist groups. Education also promotes understanding between different communities, which reduces conflict.

On the other hand, those who support defence spending argue that a government's **first responsibility** is to protect its citizens. A country needs armed forces to defend its borders, respond to threats and protect its independence. The military also helps during natural disasters; in

many countries, soldiers rescue people during floods and cyclones and deliver food and medicine. Without security, they argue, economic development and education cannot continue.

However, excessive military spending can be wasteful. Modern weapons are extremely expensive, and money spent on them cannot be used for schools, hospitals or infrastructure. In some countries, defence budgets are much larger than education budgets, even when there is no immediate threat. This may reflect political interests rather than real security needs. Large military budgets can also encourage arms races between neighbouring countries, which make the region less safe rather than more.

The right balance depends on each country's situation. A country facing a real threat of invasion may need to spend more on defence for a time. However, for most nations, especially developing ones, the greatest long-term threats are poverty, poor health, unemployment and lack of skills. Investing in education is therefore often the wisest way to build a strong and secure nation. Defence spending should be sufficient to protect the country but carefully controlled and transparent.

In conclusion, both education and defence are important responsibilities of government. However, while defence protects a country today, education **builds its future**. In most cases, governments should give higher priority to education while maintaining a reasonable and efficient defence budget.

Public Transport versus Roads

As cities grow and more people own cars and motorcycles, traffic congestion has become one of the most serious urban problems in the world. Governments must decide how to spend their transport budgets: should they build more and wider roads, or should they invest in public

transport such as buses, trains and metro rail systems? This choice affects the economy, the environment and the daily lives of millions of people.

The main argument for public transport is its **efficiency**. A single train or bus can carry many more people than private cars using the same amount of road space. A metro line can move tens of thousands of passengers per hour without adding a single car to the streets. When more people use public transport, traffic congestion falls, journeys become faster and **air pollution** is reduced, which improves public health. In cities such as Dhaka, the opening of metro rail has given many commuters a faster and more reliable way to travel.

Public transport is also **fairer**. Many people, including students, elderly people, people with disabilities and low-income workers, cannot afford a car or cannot drive. Affordable public transport allows them to reach schools, jobs, hospitals and markets. In this way, it reduces inequality and gives everyone access to opportunities in the city.

In contrast, building more roads often fails to solve congestion in the long term. New and wider roads may reduce traffic for a short time, but they also encourage more people to drive, and soon the roads become crowded again. This effect has been observed in many cities around the world. Roads also take up large areas of valuable land and increase noise and pollution.

However, roads remain essential in many situations. In rural areas, where populations are spread out, it is not practical to build railways to every village, so good roads are needed to connect people to towns, markets and hospitals. Roads are also vital for transporting goods by lorry, for emergency services and for buses themselves. Poor roads can slow economic development and make life difficult for rural communities.

Public transport also has disadvantages. Metro and railway systems are extremely **expensive to build** and can take many years to complete, causing disruption during construction. They also require continuous funding for maintenance and staff. If services are unreliable, dirty or overcrowded, people will continue to prefer private cars.

The best approach is to combine both. In large cities, governments should make public transport their main priority, investing in reliable, affordable and connected systems of buses, trains and safe footpaths. At the same time, they should maintain a good road network, particularly in rural areas and for freight. Measures such as bus lanes and parking charges can also encourage people to leave their cars at home.

In conclusion, public transport offers a more efficient, cleaner and fairer solution to urban transport problems than simply building more roads. However, roads remain necessary, and a **balanced transport policy** is the key to a successful modern city.

Arts versus Science Funding

Governments fund many activities that are not strictly essential for survival, including the arts and scientific research. With limited budgets, some people argue that governments should focus on science and technology, which directly support economic growth and health, rather than on the arts, which they see as a luxury. Others believe that the arts are just as important to a healthy society.

The case for science funding is strong. Scientific research has produced vaccines, medicines, clean energy, computers and countless other inventions that have improved human life. Countries that invest in **science and technology** tend to develop high-skilled industries, create well-paid jobs and become more competitive in the global economy.

Science is also essential for solving major challenges such as climate change, disease and food security. Because many of these benefits are practical and measurable, it is easy to see why governments prioritise science.

By contrast, the benefits of the arts are often less visible, but they are still significant. The arts, including music, literature, painting, theatre, dance and film, help to **preserve a nation's culture and identity**. They tell the story of a people's history, values and experiences, and pass them on to future generations. In an age of globalisation, when foreign entertainment strongly influences young people, supporting local art helps to protect cultural diversity.

The arts also have economic value. Museums, galleries, festivals and theatres attract tourists, who spend money on hotels, restaurants and transport. The creative industries, such as film, music, design and advertising, employ large numbers of people. In addition, the arts **improve quality of life**. Music, art and literature help people relax, express their emotions and understand others, and community arts projects can bring people together and reduce social isolation.

Some argue that artists should support themselves through the market, like any other business. However, many valuable art forms, especially traditional ones such as folk music, crafts and classical dance, cannot survive on ticket sales alone. Most artists earn low incomes, and without some public support, these traditions may disappear. On the other hand, government funding should be distributed fairly and transparently, and it should not be used to promote only art that supports the government's views.

Science, too, can receive funding from private companies, which often invest heavily in research that may be profitable. Basic research and art,

however, rarely attract enough private money, which is why public funding is important for both.

The real choice, therefore, is not between science and the arts but about how much to give each. Science deserves strong support because of its practical benefits, but a modest arts budget brings large cultural, social and economic returns. Both contribute to a well-rounded society: science helps us live longer, while the arts help us **live meaningfully**.

In conclusion, governments should not abandon arts funding in favour of science. A balanced approach, with significant investment in research and a reasonable budget for the arts, will create a society that is both prosperous and culturally rich.

Healthcare and Public Services

Public services such as hospitals, schools, water supply, sanitation, police and public transport are the backbone of a modern society. Governments are responsible for providing or regulating these services, and they usually make up a large part of public spending. The quality of public services has a direct effect on citizens' health, opportunities and trust in their government.

Healthcare is often seen as the most important public service. When people are ill, they cannot work, study or care for their families. A strong **public healthcare system** ensures that everyone, regardless of income, can receive treatment. This is especially important in developing countries, where many people cannot afford private hospitals and a serious illness can push a family into poverty. Investment in **preventive healthcare**, such as vaccinations, clean water and health education, is particularly cost-effective, because it stops diseases before they become expensive to treat.

Other basic services are equally vital. Clean water and proper sanitation prevent the spread of infectious diseases. Reliable electricity and internet access allow businesses to grow and students to learn. Effective police and courts protect people's safety and property. When these services work well, people are healthier, more productive and more confident about the future.

However, providing high-quality public services is expensive, and costs continue to rise. Populations are growing and ageing, medical technology is becoming more advanced, and citizens expect better services. Governments must therefore decide how to raise enough money, usually through taxes, and how to spend it efficiently.

A major problem in many countries is **inefficiency and corruption**. Money intended for hospitals or schools may be wasted on unnecessary bureaucracy, poorly managed projects or stolen by corrupt officials. As a result, public hospitals may be overcrowded and lack medicines, and schools may lack teachers and books, even when large budgets have been approved. Rural areas often receive fewer and lower-quality services than cities.

Some people argue that private companies could provide some services more efficiently. Private hospitals and schools often have better facilities, and competition can encourage higher quality. However, private services are usually more expensive, so poor people may be excluded. For essential services such as basic healthcare, education and water, most experts agree that governments must ensure **access for all**, even if private providers play a supporting role.

To improve public services, governments can increase transparency by publishing budgets and results, use technology to reduce paperwork and corruption, train and fairly pay public workers, and give priority to

underserved rural areas. Citizens can also play a role by giving feedback and holding officials accountable.

In conclusion, healthcare and other public services are essential for a healthy, fair and productive society. Governments must invest adequately in them, but just as importantly, they must spend public money **efficiently and honestly**, so that every citizen receives the services they need.

Space Exploration

Since the first satellite was launched into orbit in the 1950s, space exploration has fascinated people around the world. Today, several countries and private companies spend large sums of money on rockets, satellites, space stations and missions to the Moon and Mars. However, many people question whether this spending is justified when there are so many urgent problems on Earth.

Critics argue that space exploration is a **waste of resources**. Millions of people still live in extreme poverty, without enough food, clean water, healthcare or education. The cost of a single major space mission could build many hospitals or schools. From this point of view, it seems wrong for governments to spend money exploring distant planets while their own citizens are suffering. Critics also point out that space programmes mainly benefit wealthy countries and companies, and that the search for life on other planets has little direct effect on ordinary people's lives.

There are also concerns about safety and the environment. Rocket launches produce pollution, and thousands of pieces of old satellites and rockets, known as space debris, now orbit the Earth, creating a risk of collisions. Some scientists also worry that trying to contact intelligent life

on other planets could be dangerous if it attracted unfriendly attention, although others think this risk is very small.

However, supporters argue that space exploration brings **enormous practical benefits**. Satellites, which were developed through space programmes, are now essential for weather forecasting, GPS navigation, television, internet and mobile communication. Weather satellites help predict cyclones and floods, giving people time to evacuate and saving many lives in countries such as Bangladesh. Satellites also help farmers monitor crops, scientists track climate change and governments respond to disasters.

Space research has also led to many **technological innovations** that are now used on Earth, including improvements in medical imaging, water purification, materials and computer technology. In addition, space exploration inspires young people to study science, technology, engineering and mathematics, which benefits the whole economy.

In the long term, some argue that exploring space may be essential for humanity's survival. Learning about other planets helps scientists understand Earth's own climate and geology, and one day, humans may need resources from space or even new places to live.

A balanced view recognises both sides. Space exploration should not take priority over basic human needs, but it does not have to be a choice between the two. Space budgets are usually a small share of total government spending, and countries can reduce costs by **cooperating internationally**, as they do on the International Space Station. Private companies are also investing in space, which reduces the burden on taxpayers.

In conclusion, although space exploration is expensive and problems on Earth are urgent, it brings valuable benefits in communication, disaster warning, technology and scientific knowledge. With sensible budgets and international cooperation, it can be a worthwhile investment in **humanity's future**.

Sports Facilities and Hosting Big Events

Many countries compete to host major international sporting events, such as the Olympic Games, the football World Cup or the cricket World Cup. Governments also spend money on stadiums, sports centres and training programmes for athletes. Supporters believe that such investments bring national pride, economic growth and healthier lifestyles, while critics argue that they are often too expensive and bring fewer benefits than promised.

Hosting a major event can bring several advantages. It puts the host country **in the international spotlight**, improving its image and attracting tourists and foreign investors. During the event, visitors spend money on hotels, restaurants, transport and souvenirs, which supports local businesses and creates temporary jobs. Governments often use the event as an opportunity to **upgrade infrastructure**, building new roads, metro lines, airports and hotels that can benefit residents for many years.

Big events can also create a sense of **national pride and unity**. When a country successfully organises a world-class tournament, citizens feel proud, and people of different backgrounds come together to support their teams. In addition, seeing top athletes compete can inspire young people to take up sport, which may improve public health.

However, the costs of hosting major events are often enormous, and they frequently exceed the original budget. Stadiums, athletes' villages and

security systems require huge amounts of public money, which could otherwise be spent on schools, hospitals or housing. After the event, some stadiums are rarely used and become expensive to maintain, a problem sometimes called "white elephants". Several host cities have been left with large debts.

There can also be social costs. In some cases, poor communities have been moved from their homes to make space for new facilities, and prices for housing and services rise in host cities. Much of the profit from tourism and broadcasting may go to international sports organisations and large companies rather than to local people.

Regular sports facilities for the public are a different matter. Local sports grounds, swimming pools, parks and community centres are relatively cheap and benefit large numbers of people every day. They encourage children and adults to exercise, reduce health problems, and give young people a positive way to spend their free time, which can reduce crime. Many experts believe that this kind of **grassroots sport** offers better value than hosting one expensive event.

Countries considering hosting a major event should therefore plan carefully. They should use existing facilities where possible, design new buildings that can be used by the community afterwards, keep budgets transparent and ensure that local people share the benefits.

In conclusion, hosting international sporting events can boost a country's image, economy and national pride, but the costs and risks are high. Governments should be cautious about such projects and give priority to **affordable community sports facilities** that improve the health and well-being of ordinary citizens every day.

Welfare and Poverty

Every society has people who cannot fully support themselves, such as unemployed workers, people with disabilities, elderly people without pensions and families living in poverty. Many governments provide **social welfare**, including unemployment benefits, pensions, food assistance and free healthcare, to help them. However, there is ongoing debate about how much welfare governments should provide and what form it should take.

The main argument for welfare is that it acts as a **safety net**. People can lose their jobs, become seriously ill or suffer accidents through no fault of their own. Without support, they may fall into deep poverty, lose their homes or be unable to feed their children. Welfare protects them during difficult periods and allows them to recover and return to work. It also reduces inequality and can help to lower crime, because people in desperate situations are more likely to break the law.

Welfare also supports the economy. When people receive benefits, they continue to spend money on food, clothing and other basic goods, which helps local businesses during economic downturns. Programmes that support children's nutrition and education, such as free school meals or small cash payments to poor families on condition that children attend school, can improve the next generation's health and skills.

However, critics argue that generous welfare can **reduce the motivation to work**. If people can receive almost as much money from benefits as from a low-paid job, some may choose not to work. Welfare is also expensive, and high spending requires high taxes, which may discourage investment and economic growth. In addition, welfare systems can suffer from fraud and inefficiency, and in some countries benefits do not reach the people who need them most.

There is also debate about the best way to help homeless people. Some suggest simply giving them money, which respects their freedom to decide what they need. Others argue that cash alone does not solve the deeper causes of homelessness, such as unemployment, mental illness, addiction or family breakdown. Providing housing, healthcare, training and counselling may offer a more **lasting solution**.

Many experts believe that the most effective welfare systems combine support with opportunity. Instead of only giving money, governments can offer job training, help with finding work, affordable childcare and incentives that make work pay better than benefits. Support should be targeted at those in genuine need, and systems should be transparent to reduce fraud.

In developing countries, where formal welfare systems may be limited, community organisations, charities and families also play an important role, and programmes such as microcredit have helped many poor people start small businesses.

In conclusion, welfare is essential to protect vulnerable people and maintain a fair society, but it must be designed carefully. The best approach is to **give people a hand up, not just a handout**, combining financial support with education, training and opportunities to become independent.

Foreign Aid

Foreign aid refers to money, goods and expertise that richer countries and international organisations give to poorer countries. Aid is used for many purposes, such as responding to natural disasters, fighting disease, building infrastructure and supporting education. While aid has helped

millions of people, there is a long-running debate about how effective it is and what form it should take.

Aid can be extremely valuable in emergencies. After earthquakes, floods, cyclones or wars, international aid provides food, clean water, medicine and shelter that **save lives**. Long-term aid has also achieved important successes, such as vaccination programmes that have greatly reduced deadly diseases, and support for schools that has allowed millions of children to receive an education.

Aid for **infrastructure** can be particularly important. Many developing countries lack good roads, bridges, electricity, ports and water systems. Poor infrastructure makes it difficult for farmers to sell their crops, for businesses to grow and for children to reach school. A new bridge or road can connect isolated villages to markets and hospitals, transforming people's lives. For this reason, some argue that infrastructure should be the first priority for foreign aid.

However, aid also faces serious problems. **Corruption** is a major concern: money may be stolen by officials or spent on projects that benefit powerful people rather than the poor. Aid can also create dependence, discouraging governments from developing their own tax systems and solutions. Sometimes, donor countries give aid with conditions that serve their own political or business interests, such as requiring the recipient to buy goods from the donor country.

There is also debate about whether **financial aid** or **practical aid** is more useful. Money allows countries to fund large projects quickly and respond flexibly to their own priorities. However, practical aid, such as training doctors, teachers and engineers, sharing technology and advising on agriculture or water management, builds skills that remain in the

country long after the aid ends. As the saying goes, it is better to teach a person to fish than to give them a fish.

Some people also argue that rich countries should focus on their own problems, such as poverty and unemployment at home, rather than giving money abroad. However, aid usually makes up only a small part of rich countries' budgets, and a more stable and prosperous world benefits everyone through trade, security and reduced migration pressures.

To make aid more effective, it should be transparent, carefully monitored and designed together with local communities, so that it meets real needs. Aid should aim to build local capacity, combining funding with training, and it should support honest governance.

In conclusion, foreign aid can save lives and support development, especially when it is used for infrastructure, health and education. However, to be truly effective, aid must avoid corruption and dependence and focus on building **long-term self-reliance** in the countries that receive it.

Taxation

Taxes are the main way that governments pay for public services such as schools, hospitals, roads, police and defence. Although few people enjoy paying taxes, a fair and efficient tax system is essential for a functioning society. Questions about who should pay, how much, and what taxes should be used for are central to many political debates.

The most basic argument for taxation is that it allows governments to provide **public goods** that individuals could not provide alone. A single person cannot build a national highway or a public hospital, but when millions of people contribute through taxes, these services become

possible. Taxes also allow governments to support vulnerable people, invest in the future and respond to emergencies.

Many countries use a **progressive tax system**, in which people with higher incomes pay a higher percentage of their income in tax. Supporters argue that this is fair, because wealthy people can afford to contribute more without suffering hardship, while poor people need every taka they earn for basic needs. Progressive taxation can also reduce inequality, which many believe leads to a more stable and peaceful society.

Governments also use taxes to **influence behaviour**. Taxes on tobacco, alcohol and sugary drinks discourage unhealthy habits, while taxes on fuel and pollution can encourage cleaner energy. At the same time, tax reductions can be used to encourage positive activities, such as investing in new businesses or installing solar panels.

However, taxation also has disadvantages. Very high taxes may discourage people from working harder or starting businesses, and they may cause wealthy individuals and companies to move their money or operations to countries with lower taxes. Some people feel that high taxes punish success. In addition, if citizens believe that their taxes are wasted or stolen through corruption, they may lose trust in the government and try to avoid paying.

Tax evasion is a serious problem in many countries, including developing ones. When wealthy people and large companies avoid paying their share, the burden falls more heavily on ordinary workers, and governments have less money for public services. Improving tax collection, using digital systems and closing loopholes can increase revenue without raising tax rates.

The key to a successful tax system is fairness and transparency. Citizens are more willing to pay taxes when they can see that their money is spent wisely on schools, hospitals and roads. Governments should therefore publish clear information about how tax money is used and fight corruption strongly.

In conclusion, taxation is necessary to fund the public services that everyone depends on. A fair system, in which those who earn more contribute more, combined with honest and efficient spending, can **build public trust** and support a prosperous and equal society.

Rural Development

In many developing countries, including Bangladesh, a large part of the population still lives in rural areas. Yet villages often have fewer services and opportunities than cities. Roads may be poor, electricity and internet unreliable, schools and hospitals far away and good jobs scarce. As a result, many young people move to cities in search of work. **Rural development** aims to improve life in the countryside and reduce the gap between rural and urban areas.

One of the most important areas of rural development is **infrastructure**. Good roads and bridges allow farmers to transport their crops to markets quickly, reducing waste and increasing their income. They also make it easier for children to reach schools and for patients to reach hospitals. Reliable electricity, including solar power in remote areas, allows families to study at night, run small businesses and use modern equipment.

Access to the internet is increasingly important. With a stable connection, rural students can take online courses, farmers can check market prices and weather forecasts, and small businesses can sell products online.

Digital services, such as mobile banking, have already transformed many villages by making it easier to send and save money.

Rural development also involves improving **public services**. Many villages have a shortage of qualified teachers and doctors, because professionals prefer to live in cities. Governments can offer incentives, such as higher salaries, housing and faster promotion, to encourage them to work in rural areas. Mobile clinics and telemedicine can also bring healthcare to remote communities.

Creating jobs outside agriculture is another key goal. Small industries, food processing, crafts, tourism and digital work can provide employment, so that young people do not have to leave their villages. Training programmes and small loans can help rural people start their own businesses.

Agriculture itself can also be modernised. Training farmers in better techniques, providing quality seeds and affordable equipment, and building storage facilities and cold chains can reduce crop losses and increase incomes. When farmers can store their harvest and sell it at a fair price instead of being forced to sell immediately, their families become more secure.

There are strong reasons to invest in rural development. It improves the lives of millions of people and reduces poverty. It also reduces pressure on overcrowded cities, where rapid migration has led to slums, traffic and pollution. In addition, it supports agriculture, which is essential for national food security.

However, rural development can be expensive and slow, because populations are spread over large areas, and some projects may benefit relatively few people. Governments must therefore plan carefully,

prioritising projects with the greatest impact and involving local communities in decision-making so that projects meet their real needs.

In conclusion, rural development is essential for a fair and balanced society. By investing in infrastructure, services and jobs in the countryside, governments can **reduce inequality**, slow migration to cities and give rural people the opportunity to build a good life **without leaving their homes**.

Museums, Libraries and Heritage

Museums, libraries, historic buildings and cultural sites preserve a nation's memory. They contain objects, documents, artworks and buildings that tell the story of a people's past. Many governments fund these institutions, but in times of limited budgets, some people question whether public money should be spent on preserving the past rather than on present needs.

The main argument for supporting museums and heritage is that they **preserve history and identity**. Historic sites and museum collections help people understand where they come from and how their society developed. In Bangladesh, for example, museums about the Language Movement and the Liberation War help young people learn about the sacrifices that shaped their nation. Without such institutions, important parts of history could be forgotten or lost.

Museums and libraries are also important **educational resources**. School trips to museums make history and science come alive in a way that textbooks cannot. Public libraries give everyone, regardless of income, free access to books, newspapers, computers and the internet, which supports lifelong learning. For students from poor families, a library may be the only quiet place to study.

Heritage sites also bring **economic benefits** through tourism. Ancient temples, mosques, palaces and archaeological sites attract visitors from home and abroad, who spend money on transport, hotels, food and souvenirs. This creates jobs for local people and encourages the protection of the surrounding area.

However, there are arguments against high spending on heritage. Maintaining old buildings and large collections is expensive, and some museums attract few visitors. In growing cities, some people argue that old buildings should be replaced with modern ones that meet current needs, such as housing or offices. In addition, some argue that museums should charge entry fees or find private sponsors rather than relying on taxpayers.

There is also debate about what museums should show. Some believe museums should focus mainly on local artists and national history, to protect local culture. Others argue that international exhibitions help people understand other cultures and attract more visitors.

Modern technology offers new opportunities. Museums and libraries can digitise their collections so that people anywhere can access them online, and interactive displays can attract younger visitors. However, digital copies cannot fully replace the experience of seeing a real historical object or visiting an ancient site.

A balanced approach is best. Governments should protect the most important heritage sites and support museums and libraries, especially those with educational value, while encouraging them to raise additional income through tickets, shops, events and sponsorship.

In conclusion, museums, libraries and heritage sites are valuable investments in education, identity and tourism. Although they must be

managed efficiently, they help societies **learn from the past** and pass their culture on to future generations.

Part 4 — Vocabulary & Collocation Bank

Learn **10–15 items per day**. For each item, say the collocation aloud and write one sentence of your own.

Government and budgets

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
public spending (n)	সরকারি ব্যয়	**increase / cut** public spending	The government plans to increase public spending on schools.
allocate (v)	বরাদ্দ করা	**allocate** funds / money **to**	More money should be allocated to rural hospitals.
budget (n)	বাজেট	**a limited / national** budget; **the education** budget	Every government works with a limited budget.
funding (n)	অর্থায়ন	**receive / provide** funding; **public** funding	Museums receive public funding.
taxpayers' money (n)	করদাতাদের অর্থ	**waste** taxpayers' money	Unused stadiums waste taxpayers' money.
give priority to	অগ্রাধিকার দেওয়া	**give higher priority to** education	Governments should give higher priority to education.

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
at the expense of	কোনো কিছুর ক্ষতি করে	**at the expense of** essential services	Arts funding should not come at the expense of essential services.
value for money (n)	অর্থের সঠিক মূল্য	**offer / provide good** value for money	Community sports centres offer good value for money.
a worthwhile investment	লাভজনক বিনিয়োগ	**prove to be** a worthwhile investment	Education is always a worthwhile investment.
transparency (n)	স্বচ্ছতা	**improve / ensure** transparency	Publishing budgets online improves transparency.
corruption (n)	দুর্নীতি	**fight / tackle** corruption	Aid is wasted when governments fail to tackle corruption.

Public services and infrastructure

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
public services (n)	জনসেবা	**provide / improve** public services	Taxes pay for public services such as schools.
infrastructure (n)	অবকাঠামো	**invest in / upgrade** infrastructure	Good infrastructure helps businesses grow.

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
public transport (n)	গণপরিবহন	**reliable / affordable** public transport	Affordable public transport helps poor workers.
traffic congestion (n)	যানজট	**reduce / ease** traffic congestion	Metro rail can ease traffic congestion.
road network (n)	সড়ক ব্যবস্থা	**maintain / expand** the road network	Rural areas need a good road network.
rural development (n)	গ্রামীণ উন্নয়ন	**promote / invest in** rural development	Rural development reduces migration to cities.
access to (n)	পাওয়ার সুযোগ	**equal / easy** access to services	Everyone should have equal access to healthcare.
basic needs (n)	মৌলিক চাহিদা	**meet** people's basic needs	The government's first duty is to meet basic needs.

Defence, welfare and tax

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
defence / military spending (n)	প্রতিরক্ষা / সামরিক ব্যয়	**increase / reduce** military spending	Some countries spend too much on the military.
national security (n)	জাতীয় নিরাপত্তা	**protect / threaten** national security	A strong army protects national security.

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
social welfare (n)	সামাজিক কল্যাণ	**provide** social welfare	Social welfare protects the poorest families.
a safety net (n)	সুরক্ষা জাল	**provide** a safety net **for**	Unemployment benefits provide a safety net for workers.
the poverty line (n)	দারিদ্র্যসীমা	**live below** the poverty line	Millions still live below the poverty line.
progressive tax (n)	প্রগতিশীল কর (আয় অনুযায়ী বেশি কর)	**introduce** a progressive tax system	A progressive tax system reduces inequality.
tax evasion (n)	কর ফাঁকি	**crack down on** tax evasion	The government must crack down on tax evasion.
inequality (n)	বৈষম্য	**reduce / widen** inequality	Free education helps to reduce inequality.
a hand up, not a handout	স্বাবলম্বী হতে সাহায্য, শুধু দান নয়	welfare should be **a hand up, not a handout**	Job training gives people a hand up, not a handout.

Arts, science, sport and heritage

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
the arts (n)	শিল্পকলা	**fund / support** the arts	Many governments support the arts.

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
cultural heritage (n)	সাংস্কৃতিক ঐতিহ্য	**preserve / protect** cultural heritage	Museums preserve cultural heritage.
national identity (n)	জাতীয় পরিচয়	**strengthen** national identity	Traditional music strengthens national identity.
scientific research (n)	বৈজ্ঞানিক গবেষণা	**fund / carry out** scientific research	Scientific research leads to new medicines.
space exploration (n)	মহাকাশ অনুসন্ধান	**invest in** space exploration	Some countries invest heavily in space exploration.
technological innovation (n)	প্রযুক্তিগত উদ্ভাবন	**lead to** technological innovation	Space research has led to technological innovation.
host an event	কোনো আয়োজন করা	**host** the Olympic Games / World Cup	Hosting the World Cup is extremely expensive.
grassroots sport (n)	তৃণমূল পর্যায়ের খেলাধুলা	**invest in** grassroots sport	Investing in grassroots sport benefits more people.
tourist attraction (n)	পর্যটন আকর্ষণ	**a major** tourist attraction	The old palace is a major tourist attraction.

Aid and international issues

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
foreign aid (n)	বিদেশি সাহায্য	**receive / provide** foreign aid	Many developing countries receive foreign aid.
developing countries (n)	উন্নয়নশীল দেশ	**support / help** developing countries	Rich nations should help developing countries.
humanitarian aid (n)	মানবিক সাহায্য	**deliver** humanitarian aid	Humanitarian aid was delivered after the cyclone.
dependence on (n)	নির্ভরশীলতা	**create / reduce** dependence on aid	Practical training reduces dependence on aid.
self-reliance (n)	স্বনির্ভরতা	**build / encourage** self-reliance	Good aid builds self-reliance.
international cooperation (n)	আন্তর্জাতিক সহযোগিতা	**through** international cooperation	Space stations are built through international cooperation.
long-term development (n)	দীর্ঘমেয়াদি উন্নয়ন	**the foundation of** long-term development	Education is the foundation of long-term development.
international organisations (n)	আন্তর্জাতিক সংস্থা	aid **from** international organisations	Aid from international organisations built new schools.

Word / Phrase	বাংলা অর্থ	Useful collocations	Example sentence
practical aid (n)	ব্যবহারিক সাহায্য	**provide** practical aid **and advice**	Practical aid, such as training engineers, lasts longer than money.

Useful phrases for positive and negative ideas

Positive phrases	Negative phrases
pay for itself in the long run	**a waste of** public money
bring lasting benefits to	**place a heavy burden on** taxpayers
give everyone **a fair chance**	**benefit only a small minority**
lay the foundations for	**leave** the country **in debt**
improve the quality of life	**divert money away from** essential services
a step in the right direction	**the wrong priorities**

Part 5 — Sentence Structure Toolkit

> **Paragraph mix formula:** প্রতিটি body paragraph-এ রাখার চেষ্টা করো → **1টি long simple + 1–2টি compound + 2–3টি complex + 1টি compound-complex** sentence। 5–6টি বাক্য × গড়ে 20 শব্দ = **100–120 words**।

1. Long simple sentence (rich noun phrase)

Formula: [long noun phrase] + verb + object *একটাই clause, কিন্তু subject-টা বড় ও তথ্যপূর্ণ।*

- The construction of a modern metro rail system in a crowded city **requires** huge public investment.
- Government spending on schools, hospitals and roads **affects** the daily lives of every citizen.

2. Compound with *and / but / so / yet*

- Hosting the Olympic Games brings prestige, **but** it can leave a country in debt.
- Rural roads are poor, **so** farmers struggle to sell their crops.

3. Compound with semicolon + linker

- Space research is expensive**; however,** it has given us weather satellites.
- Corruption wastes public money**; therefore,** budgets should be published online.

4. Complex — concession (*Although / Even though / While*)

- **Although** defence is important, education builds a country's future.
- **Even though** arts funding is small, it supports many traditional artists.

5. Complex — reason (*Because / Since / As*)

- **Since** public transport serves people without cars, it reduces inequality.
- **Because** taxes are paid by everyone, governments must spend them wisely.

6. Complex — condition (*If / Unless / Provided that*)

- **If** governments invest in villages, fewer young people **will** move to the cities.
- Foreign aid can be effective, **provided that** it is carefully monitored.

7. Relative clause (*which / who / where / whose*)

- Satellites, **which** were developed through space programmes, now provide weather forecasts.
- Artists **whose** work preserves traditional culture deserve public support.

8. Compound-complex

Formula: Although/Because/If + clause, Clause A, and/but Clause B

- **Although** stadiums are built for big events, many are rarely used afterwards, **and** maintaining them is costly.
- **If** taxes are spent honestly, citizens trust the government, **and** they are more willing to pay.

9. Participle phrase

- **Funded** by taxpayers, public hospitals must serve everyone equally.
- **Faced** with limited budgets, governments must set clear priorities.

10. *Not only … but also …*

- Public libraries **not only** provide free books **but also** offer a quiet place to study.
- Good roads **not only** help farmers **but also** connect villages to hospitals.

11. *The more …, the more …*

- **The more** a country invests in education, **the more** productive its workforce becomes.
- **The wider** the roads, **the more** cars they attract.

12. Cleft sentence (emphasis)

- **It is** education, not weapons, **that** creates long-term security.
- **What** taxpayers want most **is** value for their money.

13. Impersonal passive

- **It is often argued that** space exploration is a waste of money.
- **It is widely accepted that** governments must provide basic services.

14. Contrasting views

- **While some people believe that** the arts are a luxury, **others see** them as essential to national identity.
- **While** financial aid works quickly, **practical aid** builds lasting skills.

15. Result / consequence

- Many host cities overspend on stadiums, **which means that** less money is left for schools.
- Rural areas lack good jobs. **As a result,** young people migrate to the cities.

Part 6 — Bangla → English Translation Essays

How to Translate These Essays

অনুবাদের ৭টি ধাপ

1. **পুরো অনুচ্ছেদটি আগে পড়ো।** প্রতিটি শব্দ নয়, মূল idea-টা বোঝো।
2. **Tag দেখো** (Simple / Compound / Complex / Compound-Complex)। লেখার আগেই ঠিক করো ইংরেজি বাক্যটির গঠন কেমন হবে।
3. **সঠিক linker বেছে নাও:** যদিও → *Although*, কারণ / যেহেতু → *because / since*, যদি → *If*, যা / যে / যেখানে → *which / who / where*, ফলে → *As a result*, অন্যদিকে → *On the other hand*, স্বীকার করতেই হয় → *Admittedly*।
4. **Word Bank ব্যবহার করো।** প্রতিটি essay-র আগে দেওয়া শব্দগুলোর মধ্যে অন্তত ৪টি ব্যবহার করার চেষ্টা করো।
5. **Word target মেনে চলো:** প্রতিটি heading-এর পাশে লেখা শব্দসংখ্যা অনুবাদের পর গুনে দেখো। কম হলে বাক্যে ব্যাখ্যা বা উদাহরণ যোগ করো।
6. **Grammar যাচাই করো:** tense, subject–verb agreement (the government **is**, governments **are**), এবং "If + were" (*If this money **were** moved…, the effect **would**…)।

7. **শব্দে শব্দে অনুবাদ করবে না।** অর্থটা স্বাভাবিক ইংরেজিতে প্রকাশ করো। ঘড়ি ধরো: প্রতিটি essay 40 মিনিটে।

Essay 1 — Agree / Disagree

> *Some people think that the government is wasting money on the arts and that this money could be better spent elsewhere. To what extent do you agree with this view?*

Source: IELTS Liz · ART-01 · Common topic ★ Arts vs science funding

Essay type: Agree / Disagree · **Position:** I completely disagree.
অবস্থান: আমি সম্পূর্ণ দ্বিমত পোষণ করি — শিল্পকলা জাতির সংস্কৃতি রক্ষা করে এবং অর্থনীতিকেও সহায়তা করে।
কাঠামো: IELTS_Agree_Disagree_Essay_Guide.md অনুযায়ী — শুরু থেকে শেষ পর্যন্ত একটিই স্পষ্ট পক্ষ, কখনো আংশিক উত্তর নয়। মোট 270–345 শব্দ।

পরিকল্পনা (Plan)

- **Introduction (35–50):** প্রশ্নের paraphrase → I completely disagree + Idea 1 (সংস্কৃতি রক্ষা) + Idea 2 (অর্থনীতিতে সহায়তা)।
- **Body Paragraph 1 (100–120) — Idea 1:** সংগীত, সাহিত্য, কারুশিল্প প্রজন্মকে যুক্ত করে → বিদেশি বিনোদনের যুগে সহায়তা জরুরি → উদাহরণ: স্কুলে লোকসংগীত দল → জাতীয় পরিচয়ে বিনিয়োগ।
- **Body Paragraph 2 (100–120) — Idea 2:** প্রাণবন্ত সংস্কৃতি পর্যটক আনে → উদাহরণ: ঐতিহ্যবাহী সংগীত উৎসব → Response: হাসপাতাল ও স্কুলের প্রয়োজন, কিন্তু শিল্পকলার অর্থ সামান্য → অপচয় নয়।
- **Conclusion (35–55):** In conclusion, I firmly believe… → Idea 1 ও Idea 2 নতুন শব্দে।

Fixed openers: I completely agree/disagree with this view because… · The main reason why I agree/disagree with this idea is that… · This is because… · …; as a result, … · For example, … · Therefore, … · Another important reason for my agreement/disagreement is that… · When… · For

instance, … · Although some people argue that…, … · Consequently, … · In conclusion, I firmly believe that…

Word Bank for this essay

a waste of public money	preserve culture and identity	traditional crafts
connect generations	foreign entertainment	a government grant
a lively cultural life	attract tourists	support local businesses
compared with their budgets	real returns	keep heritage alive

Introduction (35–50 words)

প্রায়ই যুক্তি দেওয়া হয় যে শিল্পকলায় দেওয়া সরকারি অর্থ অপচয় হয় এবং তা অন্য কাজে ব্যবহার করা উচিত। Complex আমি এই মতের সাথে সম্পূর্ণ দ্বিমত পোষণ করি, কারণ শিল্পকলা একটি জাতির সংস্কৃতি রক্ষা করে এবং অর্থনীতিকেও সহায়তা করে। Compound-Complex

Body Paragraph 1 — Idea 1 (100–120 words)

এই ধারণার সাথে আমার দ্বিমতের প্রধান কারণ হলো, শিল্পকলা একটি জাতির সংস্কৃতি ও পরিচয় (identity) রক্ষা করতে সাহায্য করে। Complex এর কারণ হলো, সংগীত, সাহিত্য, নাটক ও ঐতিহ্যবাহী কারুশিল্প একটি দেশের ইতিহাস ও মূল্যবোধ ধরে রাখে, এবং এগুলো প্রতিটি প্রজন্মকে আগের প্রজন্মের সাথে যুক্ত করে। Compound-Complex বিদেশি বিনোদন যখন তরুণদের ওপর জোরালো প্রভাব ফেলে, তখন সরকারি সহায়তা সবচেয়ে বেশি দরকার হয়; ফলে স্থানীয় ঐতিহ্য বিশ্বসংস্কৃতির পাশাপাশি টিকে থাকতে পারে। Compound-Complex উদাহরণস্বরূপ, সরকারি অনুদান

(grant) একটি লোকসংগীত দলকে স্কুলে স্কুলে গান পরিবেশন করতে সাহায্য করতে পারে, এবং এতে শিশুরা নিজেদের ঐতিহ্য সম্পর্কে জানতে পারে। Compound তাই শিল্পকলায় ব্যয় করা অর্থ জাতীয় পরিচয়ের জন্য একটি বিনিয়োগ। Simple

Body Paragraph 2 — Idea 2 (100–120 words)

আমার দ্বিমতের আরেকটি গুরুত্বপূর্ণ কারণ হলো, শিল্পকলা অর্থনীতিকেও সহায়তা করে। Complex কোনো দেশের সাংস্কৃতিক জীবন যখন প্রাণবন্ত হয়, তখন দেশটি অর্থ উপার্জন করে, কারণ জাদুঘর, গ্যালারি, উৎসব ও থিয়েটার পর্যটক আকর্ষণ করে, যারা হোটেল, রেস্তোরাঁ ও যাতায়াতে টাকা খরচ করে। Complex যেমন, একটি ঐতিহ্যবাহী সংগীত উৎসব অনেক দেশ থেকে দর্শনার্থী আকর্ষণ করতে এবং স্থানীয় ব্যবসাকে সহায়তা করতে পারে, যা ওই এলাকার পরিবারগুলোর আয় তৈরি করে। Complex যদিও কেউ কেউ যুক্তি দেন যে এই অর্থ হাসপাতাল ও স্কুলে যাওয়া উচিত, শিল্পকলায় ব্যয় করা অর্থ তাদের বাজেটের তুলনায় খুবই সামান্য। Complex ফলে শিল্পকলায় অর্থায়ন বাস্তব সুফল আনে, এবং একে জনগণের অর্থের অপচয় হিসেবে দেখা উচিত নয়। Compound · Passive

Conclusion (35–55 words)

পরিশেষে, আমি দৃঢ়ভাবে বিশ্বাস করি যে শিল্পকলায় সরকারি ব্যয় জনগণের অর্থের একটি বুদ্ধিমান ব্যবহার। Complex সাংস্কৃতিক কর্মকাণ্ড দেশের ঐতিহ্যকে বাঁচিয়ে রাখে, এবং এগুলো অনেক এলাকায় দর্শনার্থী ও কর্মসংস্থানও নিয়ে আসে। Compound

Essay 2 — Discussion (Both Views + Opinion)

> *Some people think that space exploration is a waste of resources, while others think that it is essential for mankind to continue to explore the universe in which we live. Discuss both sides and give your opinion.*

Source: IELTS Liz · SPA-03

Essay type: Discussion · **Position:** Space exploration is essential for humanity.
অবস্থান: মহাকাশ অনুসন্ধান মানবজাতির জন্য অপরিহার্য।
কাঠামো: IELTS_Discuss_Both_Views_Essay_Guide.md অনুযায়ী — বিপরীত মত আগে, আমার মত শেষে। মোট 260–299 শব্দ।

পরিকল্পনা (Plan)

- **Introduction (35–45):** দুই মত (অপচয় আগে, অপরিহার্য শেষে) → আমার মত + কারণ: পৃথিবীর জীবনে ব্যবহারিক সুফল।
- **Body Paragraph 1 (90–120) — বিপরীত মত, "I" ছাড়া:** বিপুল খরচ → দারিদ্র্য ও অভাব → ভুল অগ্রাধিকার → উদাহরণ: খরাপীড়িত অঞ্চলের কৃষক।
- **Body Paragraph 2 (90–120) — আমার মত:** ব্যবহারিক সুফল → স্যাটেলাইট ও আবহাওয়ার পূর্বাভাস → উদাহরণ: বাংলাদেশে ঘূর্ণিঝড়ের আগাম সতর্কতা → Response: এই স্যাটেলাইট গরিব মানুষকেই সরাসরি রক্ষা করে।
- **Conclusion (35–45):** প্রশ্ন নতুন শব্দে → দারিদ্র্যের জরুরি অবস্থা স্বীকার + গবেষণা অপরিহার্য।

Fixed openers: While some people argue that..., others believe that... · I completely support the latter view because... · On the one hand, people who... argue that... · For this reason, many people believe that... · On the

other hand, I firmly believe that… because… · Although some people argue that…, … · Consequently, … · In conclusion, people hold different views on whether… · While…, I firmly believe that… because…

Word Bank for this essay

space exploration	waste valuable resources	essential for humanity
enormous sums of money	extreme poverty	the wrong priorities
practical benefits	weather forecasts	early warnings
coastal communities	a wise investment	protect lives

Introduction (35–45 words)

কেউ কেউ যুক্তি দেন যে মহাকাশ অনুসন্ধান মূল্যবান সম্পদের অপচয়, অন্যদিকে অনেকে বিশ্বাস করেন যে এটি মানবজাতির জন্য অপরিহার্য। Complex আমি শেষের মতটিকে সম্পূর্ণ সমর্থন করি, কারণ মহাকাশ গবেষণা পৃথিবীর জীবনে ব্যবহারিক সুফল নিয়ে আসে। Complex

Body Paragraph 1 — বিপরীত মত (90–120 words)

একদিকে, যারা মহাকাশ অনুসন্ধানের বিরোধিতা করেন, তারা যুক্তি দেন যে এতে বিপুল অর্থ ব্যয় হয়, যা জরুরি সমস্যা সমাধানে ব্যবহার করা যেত। Complex লক্ষ লক্ষ মানুষ এখনো চরম দারিদ্র্যে বাস করে, যাদের যথেষ্ট খাবার, বিশুদ্ধ পানি, চিকিৎসা বা শিক্ষা নেই। Complex এই চাহিদাগুলো পূরণ না হলেও দূরের গ্রহের পেছনে বিশাল বাজেট ব্যয় করা হয়; ফলে মনে হয় সরকারের অগ্রাধিকার ভুল (the wrong priorities)। Compound · Passive উদাহরণস্বরূপ, খরাপীড়িত অঞ্চলের একজন কৃষক দূরের কোনো গ্রহের নতুন ছবি থেকে সরাসরি কিছুই পান না, এবং এটি

এই ব্যয়কে অন্যায্য মনে করাতে পারে। Compound এ কারণে অনেকে বিশ্বাস করেন যে মহাকাশ অনুসন্ধান সম্পদের অপচয়। Complex

Body Paragraph 2 — আমার মত (90–120 words)

অন্যদিকে, আমি দৃঢ়ভাবে বিশ্বাস করি যে মহাকাশ অনুসন্ধান অপরিহার্য, কারণ এটি দৈনন্দিন জীবনে অনেক ব্যবহারিক সুফল এনেছে। Complex ঝড় ও বন্যা যখন মানুষকে বিপদে ফেলে, তখন মহাকাশ কর্মসূচির মাধ্যমে তৈরি স্যাটেলাইট আবহাওয়ার পূর্বাভাস দেয়, এবং এই পূর্বাভাস পরিবারগুলোকে প্রস্তুত হওয়ার সময় দেয়। Compound-Complex উদাহরণস্বরূপ, আবহাওয়া স্যাটেলাইট কয়েক দিন আগেই বাংলাদেশের উপকূলীয় জনগোষ্ঠীকে ঘূর্ণিঝড়ের সতর্কবার্তা দিতে পারে, এবং এই আগাম সতর্কতা (early warnings) অনেক জীবন বাঁচাতে সাহায্য করেছে। Compound যদিও কেউ কেউ যুক্তি দেন যে এই অর্থ গরিব মানুষের সাহায্যে ব্যয় করা উচিত, এই স্যাটেলাইটগুলো গরিব জনগোষ্ঠীকেই সরাসরি রক্ষা করে। Complex ফলে মহাকাশ গবেষণায় অর্থ ব্যয় করা মানবজাতির ভবিষ্যতের জন্য একটি বিচক্ষণ বিনিয়োগ। Simple · Verb+ing

Conclusion (35–45 words)

পরিশেষে, মহাকাশ অনুসন্ধান অর্থের অপচয় নাকি মানবজাতির জন্য প্রয়োজনীয়, এ নিয়ে মানুষের মধ্যে ভিন্ন ভিন্ন মত আছে। Complex যদিও দারিদ্র্যের মতো সমস্যাগুলো জরুরি, আমি দৃঢ়ভাবে বিশ্বাস করি যে এই গবেষণা অপরিহার্য, কারণ এর সুফল ইতিমধ্যেই পৃথিবীতে মানুষের জীবন রক্ষা করছে। Complex

Essay 3 — Advantages and Disadvantages

> *Many governments spend large amounts of money on building new roads, while others prefer to invest in public transport. What are the advantages and disadvantages of investing in public transport rather than roads?*

Source: Practice question · Common topic ★ Public transport vs road development (no IELTS Liz question on this exact topic)

Essay type: Advantages–Disadvantages, Type 1 (no opinion asked) · **Position:** No opinion is asked for, so both sides are discussed in balance.
অবস্থান: প্রশ্নে মতামত চাওয়া হয়নি, তাই মতামত বা plan sentence নেই। Although ও While বাক্যে আগে অসুবিধা, comma-র পরে সুবিধা।
কাঠামো: IELTS_Advantages_Disadvantages_Essay_Guide.md অনুযায়ী — Type 1 (মতামত চাওয়া হয়নি) — Although-introduction, প্রতিটি body paragraph-এ ঠিক 7টি বাক্য, While-conclusion। মতামত বা "This essay will..." বাক্য নেই। মোট 310–340 শব্দ।

পরিকল্পনা (Plan)

- **Introduction (30–40):** paraphrase → Although + অসুবিধা (ব্যয়বহুল, সময়সাপেক্ষ), + সুবিধা (দক্ষ পরিবহন, গাড়িহীন মানুষের সেবা)। মতামত নেই।
- **Body Paragraph 1 (120–135) — সুবিধা, 7টি বাক্য:** বিপুল মানুষ পরিবহন → একই রাস্তায় বেশি যাত্রী → উদাহরণ: ঢাকার মেট্রো → দূষণ কমে ও দরিদ্রদের সেবা → কম ভাড়া, বৈষম্য কমে → Overall...
- **Body Paragraph 2 (120–135) — অসুবিধা, 7টি বাক্য:** ব্যয়বহুল ও দীর্ঘ নির্মাণ → রাস্তা বন্ধ, যানজট → উদাহরণ: মেট্রো লাইনের পাশের বাসিন্দা → গ্রামে রাস্তা লাগে → কৃষকের ফসল → Overall, these...

- **Conclusion (25–35):** নতুন paraphrase → While + অসুবিধা, + সুবিধা। মতামত নেই।

Fixed openers: Although… (but ছাড়া) · There is little doubt that… · To begin with, … · This is because… · For example, … · In addition, … not only… but also… · As a result, … · Overall, … · On the other hand, it cannot be denied that… · Firstly, … · …; as a result, … · For instance, … · Secondly, … · If…, …consequently… · Overall, these… · In conclusion, … · While…, …

Word Bank for this essay

transport budgets	public transport	metro rail
move large numbers of people	the same amount of road space	traffic jams
air pollution	low-income workers	reduce inequality
expensive to build	dust and noise	a good road network

Introduction (30–40 words)

সরকারকে সিদ্ধান্ত নিতে হয় যে তারা পরিবহন বাজেট নতুন রাস্তায় খরচ করবে, নাকি বাস, ট্রেন ও মেট্রোরেলে। Complex যদিও গণপরিবহন নির্মাণ ব্যয়বহুল ও সময়সাপেক্ষ, এটি দক্ষতার সাথে মানুষ পরিবহন করে এবং যাদের গাড়ি নেই তাদের সেবা দেয়। Complex

Body Paragraph 1 — সুবিধা (120–135 words)

এতে কোনো সন্দেহ নেই যে গণপরিবহনে বিনিয়োগ শহরের বাসিন্দাদের জন্য উল্লেখযোগ্য সুবিধা বয়ে আনে। Complex প্রথমত, সবচেয়ে বড় সুবিধা হলো, গণপরিবহন দক্ষতার সাথে বিপুল সংখ্যক মানুষকে এক জায়গা থেকে আরেক জায়গায় নিয়ে যায়। Complex এর কারণ হলো,

একই পরিমাণ রাস্তার জায়গা ব্যবহার করে একটি ট্রেন বা বাস ব্যক্তিগত গাড়ির চেয়ে অনেক বেশি মানুষ বহন করতে পারে। Complex উদাহরণস্বরূপ, ঢাকার একটি মেট্রো ট্রেন শত শত ব্যক্তিগত গাড়ির সমান যাত্রী বহন করতে পারে, এবং এতে নিচের রাস্তাগুলোতে যানজট কমে। Compound এছাড়া, গণপরিবহন শুধু বায়ুদূষণই কমায় না, যাদের গাড়ি কেনার সামর্থ্য নেই তাদেরও সেবা দেয়। Complex কম ভাড়ার ফলে শিক্ষার্থী, বয়স্ক মানুষ ও নিম্ন আয়ের কর্মীরা স্কুল, কর্মস্থল ও হাসপাতালে পৌঁছাতে পারে, যা বৈষম্য (inequality) কমায়। Complex সব মিলিয়ে, গণপরিবহন শহরের যাতায়াতকে সবার জন্য দ্রুত, পরিচ্ছন্ন ও ন্যায্য করে তোলে। Simple

Body Paragraph 2 — অসুবিধা (120–135 words)

অন্যদিকে, এটি অস্বীকার করা যায় না যে গণপরিবহনে বিনিয়োগের কিছু অসুবিধাও আছে। Complex প্রথমত, আধুনিক ব্যবস্থা নির্মাণ অত্যন্ত ব্যয়বহুল (expensive to build), এবং তা শেষ হতে অনেক বছর লাগতে পারে। Compound নির্মাণকাজের জন্য প্রায়ই দীর্ঘ সময় রাস্তা বন্ধ থাকে; ফলে নতুন ব্যবস্থা চালু হওয়ার আগে যানজট আরও খারাপ হয়। Compound-Complex যেমন, নতুন মেট্রো লাইনের পথের পাশে যারা বাস করেন, লাইনটি নির্মাণের সময় তাদের বছরের পর বছর যানজট, ধুলা ও শব্দের কষ্ট সহ্য করতে হতে পারে। Complex · Passive দ্বিতীয়ত, রাস্তার প্রয়োজনীয়তা একটি গুরুতর বিষয় থেকেই যায়, কারণ বাস ও ট্রেন প্রতিটি গ্রামে পৌঁছাতে পারে না। Complex সরকার যদি রাস্তায় খুব কম খরচ করে, তাহলে কৃষকেরা ফসল বাজারে নিতে হিমশিম খেতে পারেন, এবং ফলস্বরূপ গ্রামাঞ্চল আরও পিছিয়ে পড়তে পারে। Compound-Complex

সব মিলিয়ে, এই আর্থিক ও বাস্তব সমস্যাগুলো বোঝায় যে গণপরিবহন কখনো রাস্তার জায়গা পুরোপুরি নিতে পারে না। Complex

Conclusion (25–35 words)

পরিশেষে, রাস্তা নাকি গণপরিবহন — এই বাছাই সরকারের জন্য একটি বড় সিদ্ধান্ত। Simple যদিও (While) গণপরিবহন ব্যয়বহুল এবং সব এলাকায় সেবা দিতে পারে না, এটি বেশি মানুষ বহন করে এবং দরিদ্রদের প্রতি বেশি ন্যায্য। Complex

Part 7 — Question Bank

Practise planning these questions in **5 minutes** each (Part 2 method, N-L-F test). Choose a few to write in full using the word plan of their essay-type guide (Part 2G). The hint shows which Part 3 categories give you ideas.

Agree / Disagree (one clear side)

Q1. *IELTS Liz · GOV-02 · ★ education vs defence*

> *A government has a responsibility to its citizens to ensure their safety. Therefore, some people think that the government should increase spending on defence but spend less on social benefits. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Education vs Defence; Welfare & Poverty

Q2. *IELTS Liz · GOV-04*

> *Some people think that the government should give money to creative people, such as artists and musicians. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Arts vs Science Funding; Museums & Heritage

Q3. *IELTS Liz · GOV-05 · ★ arts funding*

> *The government should lower the budget for the arts in order to allocate more money to education. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Arts vs Science Funding; Education vs Defence

Q4. *IELTS Liz · ART-06*

> *Most artists earn low salaries and should therefore receive funding from the government in order to continue with their work. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Arts vs Science Funding; Welfare & Poverty

Q5. *IELTS Liz · SPA-02*

> *The government is spending a lot of money to discover life on other planets. Some people think that the government is wasting money and should spend more money addressing the problems of the public. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Space Exploration; Healthcare & Public Services

Q6. *IELTS Liz · SOC-03*

> *Most societies have homeless people. Some people think that the best way to help them is to give them money. To what extent do you agree?*

Guide: Agree / Disagree guide

Use ideas from: Welfare & Poverty

Q7. *Practice question*

People who earn more money should pay a higher percentage of their income in tax. Do you agree or disagree?

Guide: Agree / Disagree guide

Use ideas from: Taxation; Welfare & Poverty

Discuss Both Views

Q8. *Practice question*

Some people think that governments should spend money on preserving old buildings and museums, while others think the money should be spent on modern facilities. What is your opinion?

Guide: Discuss Both Views guide

Use ideas from: Museums, Libraries & Heritage; Healthcare & Public Services

Q9. *IELTS Liz · GOV-03*

Some people think that the government is responsible for the rise in obesity in children, while others think it is the fault of the parents. Discuss both sides and give your opinion.

Guide: Discuss Both Views guide

Use ideas from: Role of Government; Chapter 04 (Obesity & Responsibility)

Q10. *IELTS Liz · SPA-01*

Some scientists think that there are intelligent life forms on other planets and that messages should be sent to contact them. Other scientists think

it is a bad idea and would be dangerous. Discuss both views and give your own opinion.

Guide: Discuss Both Views guide

Use ideas from: Space Exploration

Q11. *IELTS Liz · SOC-04 (planned in Part 2F)*

More developing countries are given aid from international organisations to help them with their development plans. Some people argue that financial aid is important, but others suggest that practical aid and advice are more important. Discuss both views and give your opinion.

Guide: Discuss Both Views guide

Use ideas from: Foreign Aid; Rural Development

Q12. *Practice question*

Some people believe that unemployed people should receive financial support from the government, while others think this discourages them from looking for work. Discuss both views and give your opinion.

Guide: Discuss Both Views guide

Use ideas from: Welfare & Poverty; Taxation

Cause/Problem + Solution

Q13. *Practice question*

In many countries, public hospitals and schools are overcrowded and lack resources. What are the causes of this problem, and what can

governments do to solve it?

Guide: Cause/Problem + Solution guide

Use ideas from: Healthcare & Public Services; Taxation; Rural Development

Q14. *Practice question*

In many developing countries, people in rural areas have far fewer opportunities than people in cities. Why is this the case? What can governments do to improve life in rural areas?

Guide: Cause/Problem + Solution guide

Use ideas from: Rural Development; Public Transport vs Roads

Part 8 — Self-Check Checklist

Use this after **every** translated essay (Part 6) and **every** homework essay (Part 9). Give yourself 1 point for each "Yes".

#	Check	Yes / No
1	Did I answer **every part** of the question?	
2	Is my **position clear** in the introduction and the same in the conclusion?	
3	Does each body paragraph have **one main idea + explanation + example**?	
4	Did I use at least **5 complex** and **2 compound-complex** sentences?	
5	Did I use **8+ words or collocations** from the Word Bank / Part 4 correctly?	
6	Did I check **articles** (a/an/the), **plurals** and **subject–verb agreement**?	
7	Did I avoid repeating the same word more than **3 times** (e.g. "government", "money")?	
8	Did I follow my **essay-type guide** (Part 2G): its structure, its word plan (about **280 words**) and no partial opinion, in 40 minutes?	

> **Common mistakes in government essays (এগুলো এড়িয়ে চলো):**
>
> - ❌ *Government should spend more money.* → ✅ **The government** should… / **Governments** should… (article or

plural)

- ❌ *Government spend a lot of money.* → ✅ The government **spends** a lot of money.
- ❌ *spend money for education* → ✅ spend money **on** education; invest **in** education
- ❌ *budget of education is less* → ✅ the education budget is **small / insufficient**
- ❌ *Arts is important.* → ✅ **The arts are** important (meaning music, painting, theatre…).
- ❌ *If government will spend more…* → ✅ **If** the government **spends** more, … **will** …
- **"spend money" প্রতিশব্দ:** allocate funds to, invest in, fund, finance, devote resources to, channel money into

Part 9 — Homework Essays

Write these essays **alone in English**, without looking at Part 6. Plan for 5 minutes, write for 35 minutes, and check with the Part 8 checklist. There is **no model answer** — send your essay to the AI if you want feedback.

Homework 1 — Double Question

> *In many countries, the government spends a large share of its budget on defence. Why do you think this is the case? Do you think more of this money should be spent on education instead?*

Source: Practice question · ★ Government should spend more on education than defence (no IELTS Liz question on this exact topic)

Essay type: Double Question — List + Opinion · **Time:** 40 minutes · **Length:** 260–300 words
Word plan: Intro 30–40 · BP1 = Q1 (List block) 90–120 · BP2 = Q2 (Opinion block) 90–120 · Conclusion 30–40
Use ideas from: Education vs Defence; Role of Government; Taxation

ভাবনার প্রশ্ন (Thinking prompts)

- Q1 "কেন প্রতিরক্ষায় বেশি ব্যয়" কারণ জানতে চায়, তাই List block: 2টি কারণ (সীমান্ত নিরাপত্তা, দুর্যোগে সেনাবাহিনীর ভূমিকা) ও একটি উদাহরণ, "।" ছাড়া।
- Q2 পক্ষ বেছে নিতে বলে, তাই Opinion block: হ্যাঁ অথবা না, "আংশিকভাবে" নয়। N-L-F test দিয়ে একটি কারণ বেছে নাও।
- Opinion block: শিক্ষার দীর্ঘমেয়াদি সুফল (দক্ষ জনশক্তি) + একটি উদাহরণ + Response (Although some people argue that নিরাপত্তা আগে, [তোমার পক্ষ])।
- Introduction: paraphrase + [উত্তর 1], and [উত্তর 2]। Conclusion-এ দুটি উত্তর নতুন শব্দে, নতুন idea নয়।

Try to use: national security · defend its borders · military spending · the foundation of long-term development · a skilled workforce · pay for itself · give higher priority to · a reasonable defence budget

Sentence target: use one cleft sentence (*It is education, not…, that…*) and *The more…, the more…* once.

Homework 2 — Discussion

> *Some people think that only the government can make significant changes in society, while others think that individuals can have a lot of influence. What is your opinion?*

Source: IELTS Liz · GOV-06

Essay type: Discussion (both views + opinion) · **Time:** 40 minutes · **Length:** 260–299 words

Word plan: Intro 35–45 · BP1 (the other view) 90–120 · BP2 (your view) 90–120 · Conclusion 35–45

Use ideas from: Role of Government; Chapter 03 (Education & Individual Action)

ভাবনার প্রশ্ন (Thinking prompts)

- সরকার কোন বড় পরিবর্তন আনতে পারে যা ব্যক্তি পারে না (আইন, কর, জাতীয় অবকাঠামো)?
- ব্যক্তি কীভাবে সমাজ বদলেছে? ইতিহাস বা বাংলাদেশ থেকে একটি উদাহরণ ভাবো (ভাষা আন্দোলন, সামাজিক উদ্যোক্তা, সোশ্যাল মিডিয়া প্রচারণা)।
- তোমার মত: একটিই পক্ষ বেছে নাও, কখনো আংশিক নয়। সেটি সবসময় BP2-তে রাখো।
- উপসংহারে নতুন কোনো idea বা সুপারিশ নয়: প্রশ্ন নতুন শব্দে, দুই মতের মূল কথা, আর একই মত।

Try to use: pass laws · on a large scale · raise awareness · mobilise supporters · ordinary citizens · bring about change · public pressure

Sentence target: use *While some people believe that…, others argue that…* in the introduction and one relative clause with *who*.

Homework 3 — Discussion

> *Many countries want to host international sports events, while other countries think that hosting sports events has more problems than benefits. Discuss both views and give your opinion.*

Source: IELTS Liz · SPO-05

Essay type: Discussion (both views + opinion) · **Time:** 40 minutes · **Length:** 260–299 words
Word plan: Intro 35–45 · BP1 (the other view) 90–120 · BP2 (your view) 90–120 · Conclusion 35–45
Use ideas from: Sports Facilities & Big Events; Public Transport vs Roads

ভাবনার প্রশ্ন (Thinking prompts)

- আয়োজনের সুবিধা কী (আন্তর্জাতিক পরিচিতি, পর্যটন, নতুন অবকাঠামো, জাতীয় গর্ব)?
- সমস্যা কী (বিশাল খরচ, অব্যবহৃত স্টেডিয়াম, ঋণ, দরিদ্রদের উচ্ছেদ)? একটি বাস্তব ধরনের উদাহরণ দাও।
- N-L-F test প্রয়োগ করো: কতজন উপকৃত হয়, দীর্ঘমেয়াদে কী থাকে, খরচ কে বহন করে?
- তোমার মত: একটিই পক্ষ বেছে নাও, কখনো আংশিক নয়। সেটি সবসময় BP2-তে রাখো।

Try to use: host international sports events · in the international spotlight · upgrade infrastructure · national pride · exceed the budget ·

unused stadiums · leave the country in debt · grassroots sport

Sentence target: use *Although…, …* twice and *which means that…* once.

Homework 4 — Agree / Disagree

> *A poor infrastructure prevents under-developed countries from progressing and modernising. Some people think that this should be the first problem tackled by foreign aid. To what extent do you agree with this opinion?*

Source: IELTS Liz · TRA-08

Essay type: Agree / Disagree — one clear side · **Time:** 40 minutes · **Length:** 270–345 words
Word plan: Intro 35–50 · BP1 Idea 1 100–120 · BP2 Idea 2 100–120 · Conclusion 35–55
Use ideas from: Foreign Aid; Rural Development; Public Transport vs Roads

ভাবনার প্রশ্ন (Thinking prompts)

- "first problem" একটি দৃঢ় দাবি। একটিই পক্ষ নাও: সম্পূর্ণ একমত বা সম্পূর্ণ দ্বিমত, আংশিক নয়।
- একমত হলে 2টি idea: অবকাঠামো ছাড়া কৃষক বাজারে পৌঁছাতে পারে না; শিক্ষার্থী ও রোগী স্কুল-হাসপাতালে যেতে পারে না। প্রতিটির একটি উদাহরণ।
- বিপরীত যুক্তি (স্বাস্থ্য-শিক্ষা আগে, দুর্নীতিতে অবকাঠামো ব্যর্থ) BP2-এর Response বাক্যে Although অংশে রাখো।
- উপসংহারে "সমন্বিত পরামর্শ" নয়: In conclusion, I firmly believe that… + দুটি idea নতুন শব্দে।

Try to use: poor infrastructure · connect villages to markets · humanitarian aid · basic needs · corruption · maintenance · build local capacity · long-term self-reliance

Sentence target: use *If…, …would…* once and *not only… but also…* once.
